

100 PRACTICAL AI PROMPTS

Study Smarter. Work Faster. Build Better.

For ChatGPT, Claude, Gemini & modern AI assistants —
100 reusable prompts across five areas of real life.

Study & Learning

Career & Job Search

Work & Productivity

Content & Creativity

Business & Everyday Life

EVERY PROMPT, THE SAME SHAPE

role · who the AI should be
goal · what you actually want
context · your real situation
constraints + output format

WELCOME

Small prompts. Big possibilities.

This book is a practical collection of 100 prompts built around real tasks — studying, applying for jobs, getting work done, making content, and running the everyday parts of life.

They are not magic commands. They are reusable starting points: templates you fill with your own context, adapt to your situation, and use again next week.

The goal is not just a better answer today. It is a better way of asking — thinking clearly about what you want, giving useful context, and setting the shape of the output before you hit send.

Use them, adapt them, and make them your own.

01 · THINK CLEARLY**Ask a sharper question**

Each prompt makes you decide what you actually want before the AI starts guessing for you.

02 · GIVE CONTEXT**Bring your real material**

Every prompt has placeholders for your notes, your role, your constraints — that is where results come from.

03 · GET STRUCTURE**Outputs you can use**

The prompts set the format — tables, tiers, steps, scripts — so the answer arrives ready to work with.

04 · REUSE IT**Build a workflow**

Keep the prompts that work for you. A handful of reliable ones beats hunting for a new one every time.

“The better the instruction, the better the result.”

Start here.

IMPORTANT AI can produce incorrect or incomplete information. Verify important outputs before you rely on them — especially for academic, financial, legal, employment, medical or other high-impact decisions. These prompts are tools for thinking, not a substitute for professional advice.

How to use this book

Six steps, the same every time. Nothing to install, nothing to configure — copy, fill in, run, refine.

1

Pick a prompt

Use the contents or a category index to find the task you actually have in front of you.

2

Replace placeholders

Everything in square brackets is yours to fill: [TOPIC], [SUBJECT].

3

Add real context

Paste your actual notes, resume, message or data. Vague input, vague output.

4

Run it in your tool

ChatGPT, Claude, Gemini or any capable assistant. These are plain-text prompts.

5

Review the result

Check it against the *Expected Result* on the page. If it missed, say what was off.

6

Refine and reuse

Save your edited version. The prompts you keep become your own toolkit.

ON EVERY PROMPT PAGE

A copy-ready prompt box is the dominant block — that is the part you copy. Around it: who it is for, when to use it, what to customise, how to run it, a real example, what to expect, and one pro tip. Longer prompts continue on a second page marked **CONTINUED**.

good input
→ better output
→ real result

5 rules for better AI outputs

Every prompt in this book applies these five rules. Once you know them, you can fix a weak prompt of your own in about thirty seconds.

01 Be specific

Name the topic, the subject, the audience, the length. “Explain this” gets an average answer; “explain this for a Class 11 economics exam in under 150 words” gets a usable one.

02 Give context

Say where you are stuck, what you already know, who is reading it. Context is what turns a generic answer into an answer about your situation.

03 Set constraints

Word limits, tone, what to avoid, what not to invent. Constraints are how you stop padding, guessing and made-up detail before they happen.

04 Choose the output format

Table, tiers, numbered steps, Q&A, script, bullet fragments. Deciding the shape of the answer is half of getting a useful one.

05 Review and refine

Read the answer against what you asked for, then say exactly what was off — “too formal”, “you skipped the caveat”, “make level 2 harder”. One follow-up usually beats a brand-new prompt.

A prompt that misses on all five rules cannot be rescued by a longer answer. A prompt that hits all five rarely needs a second attempt.

Save this page.

Quick start

10 must-use prompts

Ten prompts from the hundred that pay off on the very first try. Start with any of them today — each one links to its full page.

01 — 05

01

Concept Explainer (3 Levels)

BEST FOR: Study

PAGE
10

Students who don't know if they need the basic version or the detailed version of an explanation — and want both, without...

21

JD & Resume Gap Analyzer

BEST FOR: Job Search

PAGE
46

Job seekers applying to a specific role who want to know exactly what to fix before hitting submit.

41

Tone & Clarity Editor — Any Message

BEST FOR: Productivity

PAGE
85

Fixing the tone or clarity of any message — email, Slack, chat — before you send it.

45

Meeting Notes → Action Items Converter

BEST FOR: Productivity

PAGE
92

Turning messy meeting notes into a clear list of who's doing what by when.

52

Long Document Summarizer

BEST FOR: Productivity

PAGE
104

Getting through something long you need to read — a report, a policy doc, a long article — without reading every word.

Try one now. Then come back.

Quick start

10 must-use prompts

The second five: work, content, business and decisions. Same rule — copy, fill in your real context, run it.

06 — 10

55

Big Task → Step Breakdown Generator

BEST FOR: Productivity

PAGE
110

Turning an overwhelming, vague task into a concrete list of steps you can actually start on.

62

Hook Writer (Multiple Angles)

BEST FOR: Content

PAGE
125

Getting several genuinely different hook options for one piece of content, instead of one hook you're not sure about.

68

One Piece → Many Formats Repurposer

BEST FOR: Content

PAGE
137

Getting more mileage out of one piece of content by adapting it properly to different formats, not just copy-pasting it...

87

Business Idea Pressure-Test

BEST FOR: Business

PAGE
172

Getting honest scrutiny on a business idea before investing real time or money into it.

92

Decision Matrix Builder (Weighted Comparison)

BEST FOR: Business

PAGE
182

Making a genuinely hard decision between multiple options with several factors to weigh, more rigorously than a pros/cons list.

Small prompt. Big result.

Beginner prompts need one or two placeholders. Intermediate prompts want your real notes pasted in.

A better way to learn.

PROMPT #1

Beginner

Generate

Estimated time saved: 15–30 min

Concept Explainer (3 Levels)

BEST FOR

Students who don't know if they need the basic version or the detailed version of an explanation — and want both, without asking twice.

USE THIS WHEN

You're learning something new and either the textbook is too dense, or a simple explanation won't be enough for the exam.

COPY-READY PROMPT

Copy

Explain [TOPIC] in three levels, clearly separated:

LEVEL 1 – Simple: Explain it like I'm learning this for the first time, everyday language, one relatable example. No jargon.

LEVEL 2 – Exam-Ready: Explain it the way I'd need to for a [SUBJECT] exam – correct terminology, key points, anything commonly tested.

LEVEL 3 – Deeper Understanding: Explain the "why" – the underlying logic connecting this to the bigger topic, not just the definition.

Keep each level under 150 words. Each level must add something the previous one didn't – don't just reword the same explanation three times.

How to customise and run this prompt, plus an example, the expected result and one pro tip, continue on the next page.

[CONTINUES → 11](#)

PROMPT #1 — CONTINUED

Generate from page 10

Concept Explainer (3 Levels)

CUSTOMIZE

[TOPIC]

[SUBJECT]

HOW TO USE

- 1 Replace both placeholders
- 2 Run it
- 3 Start at Level 1 if new to the topic, or jump to 2/3 if you already know basics
- 4 Save strong explanations into your revision notes

EXAMPLE

[TOPIC]="supply and demand,"
[SUBJECT]="Class 11 Economics" — you get a plain-language version, an exam-focused version with the terms examiners actually look for, and a deeper "why markets behave this way" version.

EXPECTED RESULT

Three genuinely different explanations — not one explanation padded into three paragraphs.

PRO TIP If Level 2 still doesn't match your textbook's approach, paste a line from the textbook and ask why that specific phrasing is used — that's usually where the actual exam marks are hiding.

PROMPT #2

Intermediate

Diagnose

Estimated time saved: 20–40 min

Prerequisite Gap Filler

BEST FOR

Anyone who feels lost in a lesson because it assumes knowledge they don't actually have yet.

USE THIS WHEN

You're stuck on a topic not because the topic itself is hard, but because it relies on something earlier you never fully understood.

COPY-READY PROMPT

Copy

I'm trying to learn [TOPIC] and I'm getting stuck. Here's exactly where I'm confused: [DESCRIBE WHERE YOU'RE STUCK].

Before explaining [TOPIC] itself, identify the 2-4 foundational concepts I likely need to understand first for this specific confusion to make sense. For each one:

- Name it
- Explain it in 2-3 sentences
- Tell me directly whether this is likely the actual source of my confusion

Then, only after that, give a short explanation of [TOPIC] that builds on those foundations.

How to customise and run this prompt, plus an example, the expected result and one pro tip, continue on the next page.

[CONTINUES → 13](#)

PROMPT #2 — CONTINUED

Diagnose from page 12

Prerequisite Gap Filler

CUSTOMIZE

[TOPIC]

[DESCRIBE WHERE YOU'RE STUCK]

HOW TO USE

- 1 Be specific about where you're stuck — "I don't get it" gives a worse result than "I don't understand why the sign flips here"
- 2 Run it
- 3 Check off which foundational concept was actually the gap
- 4 Go revise that specific concept before returning to the main topic

EXAMPLE

[TOPIC]="integration by parts," stuck point="I don't understand why we pick u and dv the way we do" — reveals the actual gap is a shaky grasp of the product rule, not integration itself.

EXPECTED RESULT

A short, targeted diagnosis of what's actually missing — not just a repeat of the original explanation slower.

PRO TIP This works even better if you paste in one thing you tried and got wrong — the mistake itself usually points straight at the gap.

PROMPT #3

Beginner

Generate

Estimated time saved: 10–15 min

Analogy Generator

BEST FOR

Turning an abstract concept into something that actually clicks.

USE THIS WHEN

A concept makes technical sense but doesn't feel intuitive yet.

COPY-READY PROMPT

Copy

Give me 3 different analogies for [CONCEPT], each based on a different area of everyday life (e.g. one from sports, one from cooking, one from daily routines – you choose what fits).

For each analogy:

- State the analogy in 1-2 sentences
- Explain exactly which part of [CONCEPT] it maps to
- Flag one place the analogy breaks down, so I don't over-rely on it

I already understand [WHAT YOU ALREADY KNOW], so you don't need to re-explain that part.

How to customise and run this prompt, plus an example, the expected result and one pro tip, continue on the next page.

[CONTINUES → 15](#)

PROMPT #3 — CONTINUED

Generate

from page 14

Analogy Generator

CUSTOMIZE

[CONCEPT]

[WHAT YOU ALREADY KNOW]

HOW TO USE

- 1 Fill in the concept and what you already know (or delete that line if starting fresh)
- 2 Run it
- 3 Pick whichever analogy actually clicked
- 4 Reread the "breaks down" warning so you don't misapply it in an exam

EXAMPLE

[CONCEPT]="TCP vs UDP in networking" — analogies could map to registered mail vs. postcards, with the breakdown point being where the metaphor oversimplifies retransmission.

EXPECTED RESULT

Three distinct, genuinely different analogies — not the same comparison restated with different nouns.

PRO TIP Ask it to explain the same concept back to you using your favorite analogy but with zero technical terms — if you can still follow it, you actually understand it.

PROMPT #4

Beginner

Compare

Estimated time saved: 15–20 min

Confusing–Pair Untangler

BEST FOR

The concepts you keep mixing up right before an exam.

USE THIS WHEN

Two terms or ideas sound or feel similar, and you keep second-guessing which is which.

COPY-READY PROMPT

Copy

I keep confusing [CONCEPT A] and [CONCEPT B]. Help me permanently tell them apart.

Give me:

1. A one-line definition of each
2. The single biggest difference between them (not a list – the ONE thing that matters most)
3. A quick memory trick to tell them apart under exam pressure
4. One example question where picking the wrong one would be an easy mistake, and how to catch it

CUSTOMIZE

[CONCEPT A]

[CONCEPT B]

HOW TO USE

- 1 Fill in the two things you keep confusing
- 2 Run it
- 3 Actually use the memory trick — say it out loud once
- 4 Try the example question before checking the answer

EXAMPLE

[CONCEPT A]="mitosis," [CONCEPT B]="meiosis"
— clarifies the one-line core difference (identical copies vs. genetic variation) instead of a long comparative essay.

EXPECTED RESULT

A short, memorable distinction — not a textbook-style comparison table you'll forget in a day.

PRO TIP Do this for your personal "always mix these up" list a week before the exam, not the night before — memory tricks need a little time to actually stick.

PROMPT #5

Beginner

Transform

Estimated time saved: 10–15 min

Textbook Paragraph Simplifier

BEST FOR

Dense textbook or research language that's technically readable but slows you down.

USE THIS WHEN

You've read the same paragraph three times and still aren't sure what it actually said.

COPY-READY PROMPT

Copy

Rewrite the following in plain, simple language, without losing any of the actual meaning or removing important nuance:

[PASTE PARAGRAPH]

Then, in one separate line, tell me the single core idea of this paragraph in under 15 words.

CUSTOMIZE

[PASTE PARAGRAPH]

HOW TO USE

- 1 Paste the exact paragraph, not a summary of it
- 2 Run it
- 3 Read the simplified version first
- 4 Use the one-line core idea as a quick recall cue later

EXAMPLE

A dense paragraph on judicial precedent gets rewritten in plain terms, plus a one-liner: "Courts generally follow past similar rulings unless there's strong reason not to."

EXPECTED RESULT

The same meaning in noticeably plainer language, plus a compressed one-line takeaway you can actually remember.

PRO TIP If the simplified version feels like it lost something important, ask it directly: "what nuance did you leave out?" — good AI models can usually tell you.

PROMPT #6

Intermediate

Transform

Estimated time saved: 30–45 min

Smart Notes Generator

BEST FOR

Turning messy lecture notes, voice-to-text transcripts, or scattered bullet points into something you'd actually want to revise from.

USE THIS WHEN

Your notes exist, but they're a mess — out of order, repetitive, missing structure.

COPY-READY PROMPT

Copy

Turn my raw notes below into clean, exam-ready study notes.

RAW NOTES:

[PASTE YOUR NOTES]

Requirements:

- Organize into clear headings and sub-points, in a logical order (not necessarily the order I wrote them)
- Remove repetition, but don't remove any actual content
- Bold the terms/ideas that are most likely to be tested
- Add a 3-line "Quick Recap" at the very end
- If anything in my notes is unclear or looks incomplete, flag it with [UNCLEAR] instead of guessing what I meant

How to customise and run this prompt, plus an example, the expected result and one pro tip, continue on the next page.

[CONTINUES → 19](#)

PROMPT #6 — CONTINUED

Transform from page 18

Smart Notes Generator

CUSTOMIZE

[PASTE YOUR NOTES]

[UNCLEAR]

HOW TO USE

- 1 Paste your raw notes exactly as written, typos and all
- 2 Run it
- 3 Check anything flagged [UNCLEAR] against your source material
- 4 Save the cleaned version as your actual revision copy

EXAMPLE

Scattered, repetitive lecture notes on cellular respiration become a structured set with clear headings (Glycolysis → Krebs Cycle → Electron Transport Chain), bolded key terms, and a 3-line recap.

EXPECTED RESULT

Properly structured, non-repetitive notes with the testable terms visually obvious — not just your notes with nicer formatting.

PRO TIP Do this the same day you take the notes, while the missing context is still in your head — a week later, even you won't remember what "see above, page 3" meant.

PROMPT #7

Beginner

Generate

Estimated time saved: 15–20 min

Mind-Map Outliner

BEST FOR

Seeing how sub-topics connect to a bigger topic before you dive into the details.

USE THIS WHEN

You're starting a new chapter or topic and want the big picture before the fine print.

COPY-READY PROMPT

Copy

Create a text-based mind map outline for [TOPIC], structured as nested bullet points (main branches, then sub-branches, up to 3 levels deep maximum).

For each main branch, add one short phrase explaining why it matters or how it connects to the central topic – not just the label on its own.

Keep it to what's actually relevant for [SUBJECT/EXAM CONTEXT] – don't include tangential sub-topics just to look thorough.

How to customise and run this prompt, plus an example, the expected result and one pro tip, continue on the next page.

[CONTINUES → 21](#)

PROMPT #7 — CONTINUED

Generate

from page 20

Mind-Map Outliner

CUSTOMIZE

[TOPIC]

[SUBJECT/EXAM CONTEXT]

HOW TO USE

- 1 Fill in the topic and context
- 2 Run it
- 3 Copy into your notes app or redraw it visually if you're a visual learner
- 4 Use it as your chapter checklist — tick off branches as you study them

EXAMPLE

[TOPIC]="Indian freedom movement, 1857–1947," [SUBJECT/EXAM CONTEXT]="Class 10 History board exam" — produces a structured branch outline by era, without unrelated tangents outside the board syllabus.

EXPECTED RESULT

A genuinely nested outline showing real relationships — not a flat list pretending to be a mind map.

PRO TIP Ask for a second version "assuming I already know the basics" a week later — the second version should be noticeably more advanced, which tells you if you've actually progressed.

PROMPT #8

Beginner

Compare

Estimated time saved: 15–25 min

Compare & Contrast Table Builder

BEST FOR

Topics that are almost always tested by comparing two or more things.

USE THIS WHEN

You need to know not just what each thing is, but exactly how they differ across specific criteria.

COPY-READY PROMPT

Copy

Build a comparison table for: [ITEMS TO COMPARE].

Choose the 5–7 most exam-relevant criteria to compare them on for [SUBJECT] – don't just use generic categories.

Return it as an actual table (columns = items, rows = criteria), and after the table, write one sentence on the single most important distinction someone should remember if they only remember one thing.

CUSTOMIZE

[ITEMS TO COMPARE]

[SUBJECT]

HOW TO USE

- 1 List the exact items you need to compare
- 2 Run it
- 3 Screenshot or copy the table into your notes
- 4 Memorize the one-sentence "if you remember one thing" line first

EXAMPLE

[ITEMS TO COMPARE]="monarchy, democracy, dictatorship," [SUBJECT]="Class 9 Civics" — produces a table across criteria like power source, accountability, and succession, not just dictionary definitions side by side.

EXPECTED RESULT

A clean, genuinely comparative table built on criteria that matter for your specific subject — not a generic comparison template.

PRO TIP Cover the table and try to rebuild it from memory using just the criteria column — that's a better test of whether you actually know it than just rereading.

PROMPT #9

Intermediate

Transform

Estimated time saved: 30–50 min

Exam Cheat Sheet Builder

BEST FOR

Condensing an entire chapter or unit into one page you can scan in the last 10 minutes before an exam.

USE THIS WHEN

You need the absolute essentials of a large amount of material, not a summary that's still three pages long.

COPY-READY PROMPT

Copy

Create a one-page exam cheat sheet from the material below. It must fit on a single page – be ruthless about what makes the cut.

MATERIAL:

[PASTE YOUR NOTES OR CHAPTER CONTENT]

Include only:

- Key formulas/definitions (if applicable)
- Terms that are commonly tested
- Any rule with a common exception worth remembering
- Nothing that's "nice to know" but not likely to be tested

Format it in short, scannable fragments – not full sentences.

How to customise and run this prompt, plus an example, the expected result and one pro tip, continue on the next page.

[CONTINUES → 24](#)

PROMPT #9 — CONTINUED

Transform from page 23

Exam Cheat Sheet Builder

CUSTOMIZE

[PASTE YOUR NOTES OR CHAPTER...]

HOW TO USE

- 1 Paste in a full chapter or unit's worth of material
- 2 Run it
- 3 If it still doesn't fit one page when formatted, ask it to cut the bottom 20%
- 4 Print or screenshot it for last-minute review

EXAMPLE

A full chapter on chemical bonding gets compressed into formulas, bond-type rules, and common exceptions — no full explanatory paragraphs.

EXPECTED RESULT

A genuinely single-page, scannable sheet — not a "summary" that's really just a shorter essay.

PRO TIP Build this right after you finish a chapter, not the night before the exam — you'll actually remember the reasoning behind each fragment instead of just the fragment.

PROMPT #10

Beginner

Generate

Estimated time saved: 20–30 min

Flashcard Generator

BEST FOR

Turning any notes or textbook content into ready-to-use flashcards.

USE THIS WHEN

You want spaced-repetition-style revision but don't want to manually write out 30 cards.

COPY-READY PROMPT

Copy

Create [NUMBER] flashcards from the material below.

MATERIAL:

[PASTE YOUR NOTES OR CHAPTER CONTENT]

Rules:

- Format each as "Q:" and "A:" on separate lines
- Keep answers short enough to actually recall, not mini-essays
- Include a mix of definition-recall and applied "why/how" questions, not just definitions
- Avoid trick questions or ambiguous phrasing

CUSTOMIZE

[NUMBER]

[PASTE YOUR NOTES OR CHAPTER...

HOW TO USE

- 1 Paste your material and pick how many cards you want
- 2 Run it
- 3 Copy into Anki, Quizlet, or just a notes app
- 4 Test yourself without looking at the answer first

EXAMPLE

[NUMBER]=20, chapter on the Indian Constitution — produces a mix of straight recall ("What is Article 21?") and applied questions ("Why is Article 21 considered broader than it originally appears?").

EXPECTED RESULT

Ready-to-use flashcards with genuine variety — not 20 versions of the same recall question.

PRO TIP Ask for 5 extra "harder than expected" cards separately — those are usually the ones that catch people out in the actual exam.

PROMPT #11

Intermediate

Generate

Estimated time saved: 20–40 min

Practice Question Generator (Tiered Difficulty)

BEST FOR

Testing yourself at increasing difficulty instead of only easy recall questions.

USE THIS WHEN

You feel confident on a topic and want to actually stress-test that confidence.

COPY-READY PROMPT

Copy

Create 9 practice questions on [TOPIC] for [SUBJECT/EXAM LEVEL], split into 3 tiers of 3 questions each:

TIER 1 – Basic recall

TIER 2 – Applied understanding (requires using the concept, not just stating it)

TIER 3 – Exam-level difficulty (multi-step or requires connecting this topic to another one)

Provide full model answers separately at the end, not immediately after each question.

How to customise and run this prompt, plus an example, the expected result and one pro tip, continue on the next page.

[CONTINUES → 27](#)

PROMPT #11 — CONTINUED

Generate from page 26

Practice Question Generator (Tiered Difficulty)

CUSTOMIZE

[TOPIC]

[SUBJECT/EXAM LEVEL]

HOW TO USE

- 1 Fill in the topic and your exact exam level
- 2 Run it
- 3 Attempt all 9 before looking at any answers
- 4 Note which tier you actually struggled at — that's your real level

EXAMPLE

[TOPIC]="Newton's laws of motion,"
[SUBJECT/EXAM LEVEL]="JEE Main" — Tier 3 questions combine multiple laws in one scenario, matching actual exam difficulty rather than textbook-easy questions.

EXPECTED RESULT

Genuinely tiered difficulty, with model answers kept separate so you're not tempted to peek early.

PRO TIP If you breeze through Tier 3, ask for a Tier 4 — "harder than this exam would actually ask" — it builds real margin, not just exam-exact competence.

PROMPT #12

Intermediate

Diagnose

Estimated time saved: 20–30 min

Mistake–Based Practice Generator

BEST FOR

Turning your actual mistakes into a targeted practice set, instead of generic revision.

USE THIS WHEN

You've done practice questions or a mock test and got some wrong — and want to fix the actual pattern, not just that one question.

COPY-READY PROMPT

Copy

Here are questions I got wrong, with my incorrect answer and the correct answer:

[PASTE QUESTIONS + YOUR ANSWERS + CORRECT ANSWERS]

For each one:

1. Diagnose the likely reason I got it wrong (careless error, conceptual gap, misread question, etc. — be specific)
2. Group my mistakes by underlying pattern, not just list them individually
3. Create 2 new practice questions per identified pattern, similar in structure but not identical, so I can confirm I've actually fixed it

How to customise and run this prompt, plus an example, the expected result and one pro tip, continue on the next page.

[CONTINUES → 29](#)

PROMPT #12 — CONTINUED

Diagnose

from page 28

Mistake-Based Practice Generator

CUSTOMIZE

[PASTE QUESTIONS + YOUR ANSWERS +...]

HOW TO USE

- 1 Paste in your actual mistakes from a real test or practice set
- 2 Run it
- 3 Read the diagnosis honestly — don't dismiss "careless error" if it keeps happening
- 4 Attempt the new practice questions without looking at your original mistakes

EXAMPLE

Three wrong answers on a chemistry mock all turn out to share one root cause — misapplying significant figures — rather than being three unrelated mistakes.

EXPECTED RESULT

A pattern-level diagnosis, not a question-by-question "here's the right answer" list you'll forget by next week.

PRO TIP If the same pattern shows up across two different mock tests, that's not bad luck — that's your actual highest-priority topic to fix.

PROMPT #13

Intermediate

Plan

Estimated time saved: 45–90 min

2-Hour Emergency Revision Planner

BEST FOR

The genuinely last-minute situation — a couple of hours before an exam, too much material, not enough time.

USE THIS WHEN

You need a triage plan, not a compressed summary — you have to decide what to skip, not just what to read faster.

COPY-READY PROMPT

Copy

I have [TIME AVAILABLE] before my [SUBJECT] exam and this much material left to cover: [LIST REMAINING TOPICS].

I already feel confident on: [TOPICS YOU'RE ALREADY OK ON].

Build me a minute-by-minute plan for the time I have. Be honest about what I likely won't have time to properly cover, and tell me directly what to deliberately skip rather than skim everything badly. Prioritize based on likely exam weightage, not the order the topics appear in the syllabus.

How to customise and run this prompt, plus an example, the expected result and one pro tip, continue on the next page.

[CONTINUES → 31](#)

PROMPT #13 — CONTINUED

Plan from page 30

2-Hour Emergency Revision Planner

CUSTOMIZE

[TIME AVAILABLE]

[SUBJECT]

[LIST REMAINING TOPICS]

[TOPICS YOU'RE ALREADY OK ON]

HOW TO USE

- 1 Be honest about your actual remaining time and confidence level
- 2 Run it
- 3 Follow the minute blocks like a real schedule, not a loose guide
- 4 Trust the "skip this" calls — reading everything badly is worse than skipping wisely

EXAMPLE

2 hours left, 4 chapters remaining, already confident on 1 — the plan allocates almost no time to the confident chapter and triages the other 3 by likely exam weight.

EXPECTED RESULT

A realistic, time-boxed plan that admits some things won't get covered — not a plan that pretends 2 hours can properly cover 4 chapters.

PRO TIP Set an actual timer per block. The plan only works if you move on when the time's up, even mid-topic.

PROMPT #14

Intermediate

Diagnose

Estimated time saved: 20–30 min

Weak Topic Diagnostic

BEST FOR

Figuring out what to actually study first when you're not sure where you're weakest.

USE THIS WHEN

You have a syllabus with many topics and limited time, and guessing what to prioritize isn't working.

COPY-READY PROMPT

Copy

Here's my syllabus/topic list for [SUBJECT]: [LIST TOPICS].

Ask me 1-2 quick self-assessment questions per topic (things I can answer honestly about my own confidence – not full test questions) to figure out where I'm actually weak.

Once I answer, rank the topics from highest to lowest study priority based on my answers, and explain the ranking logic briefly for each.

CUSTOMIZE**HOW TO USE**

- 1 List your full topic set
- 2 Run it and answer the self-assessment questions honestly
- 3 Get your prioritized list back
- 4 Start from the top, not from whatever feels comfortable

EXAMPLE

A 10-topic syllabus gets narrowed to a top-4 priority list after honest self-rating, instead of the student re-studying the 3 topics they already know well because those feel productive.

EXPECTED RESULT

A priority order based on your actual weak points — not a generic "study everything equally" plan.

PRO TIP Redo this exercise once a week during exam prep — your weak spots shift as you study, and last week's priority list goes stale fast.

PROMPT #15

Intermediate

Analyze

Estimated time saved: 30–60 min

Exam Topic Priority Analyzer

BEST FOR

Deciding where to focus your remaining study time based on how topics have historically been weighted — not guessing what will be "asked."

USE THIS WHEN

You have past papers or a syllabus with known weightage, and want a smarter way to allocate limited study time.

COPY-READY PROMPT

Copy

Here is information about how [SUBJECT] has been examined in the past: [PASTE PAST PAPER TOPICS/FREQUENCY, OR SYLLABUS WEIGHTAGE IF YOU HAVE IT].

Based on this pattern, rank the topics by how much study-time priority they likely deserve, and explain your reasoning per topic.

Important: this is a probability-based prioritization tool, not a prediction of exact questions. Do not claim or imply that any specific topic is guaranteed to appear — frame everything as "historically weighted toward" or "lower priority based on past pattern," not certainty.

How to customise and run this prompt, plus an example, the expected result and one pro tip, continue on the next page.

[CONTINUES → 34](#)

PROMPT #15 — CONTINUED

Analyze from page 33

Exam Topic Priority Analyzer

CUSTOMIZE

[SUBJECT]

[PASTE PAST PAPER TOPICS/FREQUENCY...]

HOW TO USE

- 1 Gather whatever past-paper or weightage information you actually have
- 2 Run it
- 3 Use the ranking to allocate study time, not to skip topics entirely
- 4 Still prepare lower-priority topics at a basic level — patterns aren't guarantees

EXAMPLE

Five years of past papers show one unit appearing in some form almost every year — that unit gets flagged as historically high-priority, clearly labeled as a pattern, not a promise.

EXPECTED RESULT

A reasoned, evidence-based study priority order — never a claim about what will definitely be on the exam.

PRO TIP Combine this with the Weak Topic Diagnostic (#14) — high historical weightage *and* personal weakness is your true top priority.

PROMPT #16

Beginner

Plan

Estimated time saved: 15–25 min

Essay/Long-Answer Structuring Coach

BEST FOR

Planning a strong answer structure before you start writing, so you're not restructuring mid-essay.

USE THIS WHEN

You have an essay or long-answer question and know the content but aren't sure how to organize it well.

COPY-READY PROMPT

Copy

I need to answer this question: [PASTE QUESTION]

I have roughly [WORD LIMIT/TIME LIMIT] and it's worth [MARKS/WEIGHT] in the exam.

Give me a clear structure — an intro approach, 3–5 body sections with what each should cover (not full content, just what role each section plays), and how to conclude strongly. Also tell me roughly how much time/words to spend per section given the limit.

CUSTOMIZE

[PASTE QUESTION]

[WORD LIMIT/TIME LIMIT]

[MARKS/WEIGHT]

HOW TO USE

- 1 Paste the actual question and your real constraints
- 2 Run it
- 3 Use the structure as a skeleton — you still write the actual content
- 4 Check your time/word allocation against the plan as you write

EXAMPLE

A 40-mark, 45-minute long-answer question gets broken into an intro, 4 body sections with clear roles (context, argument, counterpoint, resolution), and a conclusion — each with a time allocation.

EXPECTED RESULT

A usable skeleton for your specific question — not a generic 5-paragraph essay template.

PRO TIP Practice building the structure for past questions without writing the full answer — structuring fast under time pressure is its own skill worth training separately.

PROMPT #17

Intermediate

Review

Estimated time saved: 20–40 min

The Socratic Tutor

BEST FOR

Actually testing whether you understand something, instead of just being told the answer again.

USE THIS WHEN

You want to check real understanding, not just get another explanation you might nod along to without absorbing.

COPY-READY PROMPT

Copy

Act as a tutor helping me understand [TOPIC]. Do not explain it to me directly. Instead, guide me toward understanding it myself by asking me one question at a time.

Rules:

- Ask only one question at a time, and wait for my answer
- If I'm wrong, don't just correct me – ask a follow-up question that helps me spot the mistake myself
- If I'm right, ask a slightly harder follow-up to deepen it
- Only give me a direct explanation if I explicitly ask you to

How to customise and run this prompt, plus an example, the expected result and one pro tip, continue on the next page.

[CONTINUES → 37](#)

PROMPT #17 — CONTINUED

Review

from page 36

The Socratic Tutor

CUSTOMIZE

[TOPIC]

HOW TO USE

- 1 Pick a topic you think you understand but haven't been tested on
- 2 Run it and actually answer each question honestly, don't guess randomly
- 3 Let yourself get questions wrong — that's the point
- 4 Ask for a direct explanation only if you're genuinely stuck

EXAMPLE

A student who thinks they understand "supply shocks" gets walked through a series of questions that reveal they can define it but can't apply it to a real scenario — surfacing the actual gap.

EXPECTED RESULT

A back-and-forth that reveals what you actually understand versus what you can recognize when it's explained — genuinely different things.

PRO TIP This works best out loud or in writing, not just reading silently — actually committing to an answer before seeing if you're right is what makes it effective.

PROMPT #18

Intermediate

Plan

Estimated time saved: 45–90 min

Exam–Countdown Study Plan Builder

BEST FOR

Building a full multi-day or multi-week study plan from scratch, based on your actual available time.

USE THIS WHEN

You have more than a day or two before the exam and need a realistic plan, not just a topic list.

COPY-READY PROMPT

Copy

My exam is on [DATE]. Today is [TODAY'S DATE]. I have roughly [HOURS PER DAY] available to study, [DAYS UNAVAILABLE, IF ANY].

Topics to cover: [LIST TOPICS], with rough difficulty/priority noted where I know it.

Build a day-by-day study plan that:

- Includes revision passes, not just first-time coverage
- Builds in at least one full practice test before the exam date
- Leaves the final day light, for review only, not new material
- Flags if the timeline is unrealistic given my available hours, rather than forcing everything to fit

How to customise and run this prompt, plus an example, the expected result and one pro tip, continue on the next page.

[CONTINUES → 39](#)

PROMPT #18 — CONTINUED

Plan from page 38

Exam–Countdown Study Plan Builder

CUSTOMIZE

[DATE]

[TODAY'S DATE]

[HOURS PER DAY]

[DAYS UNAVAILABLE, IF ANY]

[LIST TOPICS]

HOW TO USE

- 1 Fill in real dates and a realistic daily hour estimate, not an aspirational one
- 2 Run it
- 3 If it flags the timeline as unrealistic, believe it and cut scope rather than cramming
- 4 Follow it day by day, adjusting if you fall behind rather than abandoning it

EXAMPLE

18 days until the exam, 3 hours/day available, 6 topics — the plan builds in two revision passes per topic and a full mock test on day 15, and explicitly flags if a 7th topic would make the timeline unrealistic.

EXPECTED RESULT

A day-by-day plan that's honest about capacity — not an optimistic plan that assumes perfect focus every single day.

PRO TIP Rebuild this plan once, a week in, using your actual progress so far — the first version is always a guess; the second one is calibrated to reality.

PROMPT #19

Beginner

Transform

Estimated time saved: 15–30 min

Research Paper/Article Digestor

BEST FOR

Getting the key findings from a research paper or long article without reading the whole thing line by line.

USE THIS WHEN

You need to reference or understand a source, but the full text is long and dense.

COPY-READY PROMPT

Copy

Summarize the following in plain language:

[PASTE ARTICLE/PAPER TEXT]

Structure your summary as:

- Core finding/argument (2–3 sentences)
- Key supporting points (bulleted)
- Any important limitation or caveat the source itself mentions
- One sentence on why this might matter for [YOUR CONTEXT/PURPOSE]

Don't add outside information – summarize only what's actually in the text.

How to customise and run this prompt, plus an example, the expected result and one pro tip, continue on the next page.

[CONTINUES → 41](#)

PROMPT #19 — CONTINUED

Transform

from page 40

Research Paper/Article Digestor

CUSTOMIZE

[PASTE ARTICLE/PAPER TEXT]

[YOUR CONTEXT/PURPOSE]

HOW TO USE

- 1 Paste the actual text (or the abstract + key sections if it's very long)
- 2 Fill in why you're reading it — a project, an essay, general research
- 3 Run it
- 4 Go back to the original for anything you plan to directly cite

EXAMPLE

A dense research paper on sleep and memory consolidation gets reduced to its core finding, 4 supporting points, one stated limitation, and a note on relevance to a psychology assignment.

EXPECTED RESULT

A faithful, structured digest of the actual source — not a generic summary that could apply to any paper on the topic.

PRO TIP Never cite a claim directly from the AI's summary in academic work — use the summary to find the relevant section, then cite the original source itself.

PROMPT #20

Beginner

Analyze

Estimated time saved: 10–20 min

Study Doubt Resolver

BEST FOR

Asking a specific study question in a way that actually gets a useful, specific answer instead of vague AI waffle.

USE THIS WHEN

You have a genuine doubt while studying and want a precise answer, not a generic overview.

COPY-READY PROMPT

Copy

I have a specific doubt while studying [TOPIC].

What I understand so far: [WHAT YOU ALREADY UNDERSTAND]

What's confusing me: [EXACT DOUBT]

Answer only the specific doubt – don't re-explain what I already said I understand. If my "what I understand so far" section actually contains a mistake, point that out first before answering the doubt itself.

How to customise and run this prompt, plus an example, the expected result and one pro tip, continue on the next page.

[CONTINUES → 43](#)

PROMPT #20 — CONTINUED

Analyze from page 42

Study Doubt Resolver

CUSTOMIZE

[TOPIC]

[WHAT YOU ALREADY UNDERSTAND]

[EXACT DOUBT]

HOW TO USE

- 1 Actually write out what you think you understand, don't skip this part
- 2 Be as specific as possible about the doubt itself
- 3 Run it
- 4 If it corrects your "understand so far" section, that's often the real answer

EXAMPLE

A student studying osmosis explains their understanding, then asks specifically why water moves toward higher solute concentration — and the response catches a subtle mistake in their stated understanding first.

EXPECTED RESULT

A precise, targeted answer to your actual doubt — not a full re-explanation of the whole topic.

PRO TIP Writing out "what I understand so far" is often the more valuable step — half the time, writing it down helps you catch your own mistake before AI even responds.

Analyze

Estimated time saved: 20–30 min

JD & Resume Gap Analyzer

BEST FOR

Job seekers applying to a specific role who want to know exactly what to fix before hitting submit.

USE THIS WHEN

You have a job description and your current resume, and want to know what's missing, what to emphasize, and where you're weak — before a recruiter tells you "not shortlisted."

COPY-READY PROMPT

Copy

Act as a hiring manager reviewing resumes for the role below. Be direct and specific — do not soften weaknesses.

JOB DESCRIPTION: [PASTE JOB DESCRIPTION]

MY CURRENT RESUME: [PASTE RESUME TEXT]

Analyze the match and give me:

1. Required skills/keywords from the JD that are missing from my resume
2. Relevant experience I already have but haven't emphasized enough
3. The 3 weakest sections of my resume for this specific role
4. Specific line-by-line suggestions to fix each weak section
5. An overall match score out of 10, with reasoning

Do not invent or assume experience I haven't stated. Return the analysis as a clearly labeled list, not a paragraph.

How to customise and run this prompt, plus an example, the expected result and one pro tip, continue on the next page.

[CONTINUES → 47](#)

PROMPT #21 — CONTINUED

Analyze from page 46

JD & Resume Gap Analyzer

CUSTOMIZE

[PASTE JOB DESCRIPTION]

[PASTE RESUME TEXT]

HOW TO USE

- 1 Copy the JD exactly as posted
- 2 Paste your resume as plain text
- 3 Run it
- 4 Update your resume based on the specific suggestions before applying

EXAMPLE

Applying for a "Marketing Intern" role mentioning "content creation" and "campaign coordination" — but your resume just says "managed Instagram page." This flags that you're underselling relevant experience and shows how to reword it to match the JD's language.

EXPECTED RESULT

A structured breakdown of keyword gaps, underused experience, and specific rewrites — not generic resume advice.

PRO TIP Run this for every role you apply to, not once for a "master resume." A resume scoring 9/10 for one JD can score 5/10 for a slightly different one — the small edits matter more than people think.

PROMPT #22

Intermediate

Transform

Estimated time saved: 20–40 min

ATS–Friendly Resume Rewriter

BEST FOR

Making sure your resume actually gets past automated screening software before a human ever sees it.

USE THIS WHEN

You suspect your resume's formatting or phrasing might be getting filtered out before reaching a recruiter.

COPY-READY PROMPT

Copy

Rewrite my resume section below to be ATS (Applicant Tracking System) friendly, while still reading naturally to a human.

RESUME SECTION: [PASTE SECTION]

TARGET ROLE: [ROLE/JD KEYWORDS]

Rules:

- Use standard section headers and simple formatting an ATS can parse (no tables, columns, or unusual symbols)
- Naturally include relevant keywords from the target role – don't just stuff them in unnaturally
- Keep every claim truthful to what I actually wrote – don't invent new achievements
- Flag anything in my original that's likely to confuse an ATS parser (icons, unusual date formats, etc.)

How to customise and run this prompt, plus an example, the expected result and one pro tip, continue on the next page.

[CONTINUES → 49](#)

PROMPT #22 — CONTINUED

Transform from page 48

ATS-Friendly Resume Rewriter

CUSTOMIZE

[PASTE SECTION]

[ROLE/JD KEYWORDS]

HOW TO USE

- 1 Paste one section at a time (experience, skills, etc.) for better results than the whole resume at once
- 2 Include the actual role or JD keywords you're targeting
- 3 Run it
- 4 Cross-check the flagged formatting issues against your actual resume file

EXAMPLE

A resume using a decorative two-column layout with icons gets flagged as ATS-risky, with a suggested single-column reformat that keeps the same content.

EXPECTED RESULT

Cleaner, more parseable phrasing and structure — not just "add more keywords everywhere."

PRO TIP Keyword-stuffing that reads awkwardly to a human can hurt you in the actual interview — always read the rewritten version out loud before using it.

PROMPT #23

Beginner

Transform

Estimated time saved: 10–20 min

Weak Bullet → Strong Bullet Upgrader

BEST FOR

Turning vague, task-based resume bullets into achievement-based ones that actually stand out.

USE THIS WHEN

Your resume bullets describe what you did, but not the actual impact or result.

COPY-READY PROMPT

Copy

Rewrite each resume bullet below to be achievement-focused instead of task-focused. Where possible, structure it as: what I did → how → measurable result.

BULLETS:

[PASTE BULLETS]

If a bullet has no quantifiable result available, don't invent a number — instead strengthen it with clearer scope or impact language. Mark any bullet where you had to guess at missing information with [NEEDS INPUT].

How to customise and run this prompt, plus an example, the expected result and one pro tip, continue on the next page.

[CONTINUES → 51](#)

PROMPT #23 — CONTINUED

Transform from page 50

Weak Bullet → Strong Bullet Upgrader

CUSTOMIZE

[PASTE BULLETS]

[NEEDS INPUT]

HOW TO USE

- 1 Paste your current bullets exactly as they are
- 2 Run it
- 3 Fill in real numbers wherever it left [NEEDS INPUT] — don't leave placeholder text in your real resume
- 4 Compare old vs. new to make sure nothing was overstated

EXAMPLE

"Responsible for social media" becomes
"Grew Instagram following from 200 to 1,800 in 4 months by shifting to short-form video content" — assuming those numbers are real and provided.

EXPECTED RESULT

Bullets that show impact, not just duty — without fabricated metrics.

PRO TIP If you genuinely don't have a number, use scope instead: "Managed onboarding for a 12-person team" is still stronger than "Responsible for onboarding."

PROMPT #24

Beginner

Generate

Estimated time saved: 15–25 min

Portfolio/Project Description Writer

BEST FOR

Writing a project description for your portfolio, resume, or LinkedIn that actually explains why the project matters.

USE THIS WHEN

You've built something (an app, a campaign, a report) but describing it in a few sentences is harder than it should be.

COPY-READY PROMPT

Copy

Help me write a project description for [PLATFORM: e.g. portfolio website / resume / LinkedIn].

PROJECT DETAILS: [WHAT YOU BUILT, TOOLS/SKILLS USED, YOUR ROLE, ANY RESULTS OR OUTCOMES]

Structure it as:

1. One-line summary (what it is, in plain terms)
2. The problem it solves or the goal behind it
3. What you specifically did (not the team's work, your part)
4. Result or outcome, if there is one
5. Tools/skills used, listed separately

Keep the tone confident but not exaggerated – don't inflate my role or the project's impact.

How to customise and run this prompt, plus an example, the expected result and one pro tip, continue on the next page.

[CONTINUES → 53](#)

PROMPT #24 — CONTINUED

Generate

from page 52

Portfolio/Project Description Writer

CUSTOMIZE

[PLATFORM: e.g. portfolio website...

[WHAT YOU BUILT, TOOLS/SKILLS...

HOW TO USE

- 1 Give real detail — vague input produces a vague description
- 2 Specify the platform since a portfolio entry and a resume line need different lengths
- 3 Run it
- 4 Trim further if the platform has a strict length/character limit

EXAMPLE

A student's college hackathon project gets turned into a structured, one-line-summary-first description suitable for a portfolio site, clearly separating their individual contribution from the team's.

EXPECTED RESULT

A clear, structured description that separates your actual contribution from the project as a whole.

PRO TIP Always keep the "what I specifically did" section honest, especially for team projects — this is the first thing interviewers probe on.

PROMPT #25

Intermediate

Generate

Estimated time saved: 20–30 min

Cover Letter Generator

BEST FOR

Writing a cover letter that's actually specific to the role, instead of a generic template with the company name swapped in.

USE THIS WHEN

You're applying somewhere that asks for a cover letter and want it to sound like you actually read the job description.

COPY-READY PROMPT

Copy

Write a cover letter for the role below, based specifically on the overlap between the job description and my background.

JOB DESCRIPTION: [PASTE JD]

MY BACKGROUND: [PASTE RESUME OR KEY EXPERIENCE]

TONE: [e.g. formal / conversational-professional]

Requirements:

- Open with something specific to this role or company, not a generic opening line
- Reference 2-3 concrete overlaps between the JD and my actual background – don't just restate my resume
- Keep it under 300 words
- End with a clear, confident closing line, not a generic "thank you for your consideration"

How to customise and run this prompt, plus an example, the expected result and one pro tip, continue on the next page.

[CONTINUES → 55](#)

PROMPT #25 — CONTINUED

Generate

from page 54

Cover Letter Generator

CUSTOMIZE

[PASTE JD]

[PASTE RESUME OR KEY EXPERIENCE]

[e.g. formal / conversational-prof...]

HOW TO USE

- 1 Provide the actual JD, not a paraphrase of it
- 2 Provide real background detail, not just your job title
- 3 Run it
- 4 Personalize the opening line further if you know something specific about the company

EXAMPLE

For a data analyst role emphasizing "stakeholder communication," the letter pulls a specific past instance of presenting findings to non-technical stakeholders — not a generic "I'm a strong communicator" line.

EXPECTED RESULT

A letter clearly written for this specific role — not one that could be sent to any company with a find-and-replace.

PRO TIP If you can't find 2–3 genuine overlaps between the JD and your background, that's useful information too — it might mean the role isn't as strong a fit as it looked.

PROMPT #26

Beginner

Generate

Estimated time saved: 10–15 min

Career Gap Explainer

BEST FOR

Framing a resume gap or career break honestly and professionally, without over-explaining or sounding defensive.

USE THIS WHEN

You have a gap in your resume timeline and aren't sure how to address it in writing or in an interview.

COPY-READY PROMPT

Copy

Help me explain this gap in my career/education timeline in a professional, honest, and confident way – for [CONTEXT: resume / cover letter / interview answer].

GAP DETAILS: [WHAT HAPPENED DURING THE GAP, HOW LONG, ANY PRODUCTIVE ACTIVITY DURING IT]

Keep it brief, factual, and forward-looking. Don't over-apologize or over-explain. If I mention anything productive I did during the gap, work it in naturally rather than as a separate excuse.

How to customise and run this prompt, plus an example, the expected result and one pro tip, continue on the next page.

[CONTINUES → 57](#)

PROMPT #26 — CONTINUED

Generate

from page 56

Career Gap Explainer

CUSTOMIZE

[CONTEXT: resume / cover letter / ...]

[WHAT HAPPENED DURING THE GAP...]

HOW TO USE

- 1 Be honest about the actual gap — don't ask it to disguise anything
- 2 Mention anything you did during that time, even informal learning or freelance work
- 3 Run it
- 4 Practice saying the interview version out loud so it doesn't sound rehearsed

EXAMPLE

An 8-month gap due to a family health situation, during which the person did an online certification, gets framed as a brief factual explanation followed naturally by the certification — not as two disconnected points.

EXPECTED RESULT

A short, confident explanation — not a defensive paragraph that draws more attention to the gap than necessary.

PRO TIP For interviews specifically, keep your spoken version to 2–3 sentences max, then pivot back to why you're excited about the role — dwelling on it signals more discomfort than the gap itself does.

PROMPT #27

Intermediate

Generate

Estimated time saved: 20–30 min

Role-Based Interview Question Preparer

BEST FOR

Preparing for the kinds of questions commonly asked for a specific type of role, based on the JD.

USE THIS WHEN

You want to walk into an interview having actually thought through likely question areas, not just generic "tell me about yourself" prep.

COPY-READY PROMPT

Copy

Based on this job description, identify the 6-8 most likely question areas an interviewer would probe for this specific role (technical, behavioral, or situational).

JOB DESCRIPTION: [PASTE JD]

For each question area, give me one realistic example question, and briefly note what the interviewer is actually trying to assess with it.

Important: these are likely question areas based on the JD's stated requirements, not a guaranteed list of what will be asked – frame it that way.

How to customise and run this prompt, plus an example, the expected result and one pro tip, continue on the next page.

[CONTINUES → 59](#)

PROMPT #27 — CONTINUED

Generate

from page 58

Role-Based Interview Question Preparer

CUSTOMIZE

[PASTE JD]

HOW TO USE

- 1 Paste the actual JD
- 2 Run it
- 3 Prepare a real answer (or use the STAR Method Builder, #28) for each area
- 4 Don't memorize scripts word-for-word — know your key points instead

EXAMPLE

A JD emphasizing "cross-functional collaboration" flags a likely behavioral question area around working with difficult stakeholders, with a sample question and a note on what trait it's really testing (conflict handling, not just teamwork).

EXPECTED RESULT

A realistic, JD-grounded set of likely question areas — clearly framed as probability, not a leaked question list.

PRO TIP Pay closest attention to any requirement in the JD you're personally weakest on — that's disproportionately likely to come up, precisely because the interviewer will want to check it.

PROMPT #28

Intermediate

Generate

Estimated time saved: 15–25 min

STAR Method Answer Builder

BEST FOR

Turning a real experience into a structured, interview-ready STAR (Situation, Task, Action, Result) answer.

USE THIS WHEN

You have a behavioral interview question and a relevant real experience, but struggle to structure it clearly on the spot.

COPY-READY PROMPT

Copy

Help me build a STAR-method answer for this interview question:
[PASTE QUESTION]

My real experience to draw from: [DESCRIBE WHAT HAPPENED, ROUGHLY]

Structure the answer with clear Situation / Task / Action / Result sections. Keep the Action section the longest – that's what interviewers care about most. Keep the whole answer speakable in under 90 seconds. Don't invent details I didn't mention.

CUSTOMIZE

[PASTE QUESTION]

[DESCRIBE WHAT HAPPENED,
ROUGHLY]

HOW TO USE

- 1 Pick a real experience, even a rough or informal one
- 2 Describe it honestly, including the messy parts
- 3 Run it
- 4 Practice saying it out loud, don't just read it silently

EXAMPLE

"Tell me about a time you handled conflict in a team" gets built into a structured answer from a rough description of a group project disagreement, with the Action section clearly showing what the person specifically did to resolve it.

EXPECTED RESULT

A structured, appropriately-paced answer built on your real experience — not a generic "textbook STAR example."

PRO TIP Prepare 4–5 flexible STAR stories from your real experience in advance, not one answer per possible question — most behavioral questions can be answered by adapting the same handful of strong stories.

PROMPT #29

Intermediate

Review

Estimated time saved: 20–40 min

Mock Interviewer (Adaptive Follow-Ups)

BEST FOR

Practicing under something closer to real interview pressure, including follow-up questions.

USE THIS WHEN

You want to rehearse out loud, not just prepare answers you never actually say.

COPY-READY PROMPT

Copy

Act as an interviewer for a [ROLE] position at a [COMPANY TYPE/INDUSTRY]. Interview me one question at a time.

Rules:

- Ask one question, wait for my answer
- After I answer, ask at least one realistic follow-up question based specifically on what I said – don't move to a new topic immediately
- If my answer is vague or missing detail, push for specifics, the way a real interviewer would
- After 5 questions, give me honest feedback: what was strong, what was weak, and one thing to fix before a real interview

How to customise and run this prompt, plus an example, the expected result and one pro tip, continue on the next page.

[CONTINUES → 62](#)

PROMPT #29 — CONTINUED

Review from page 61

Mock Interviewer (Adaptive Follow-Ups)

CUSTOMIZE

[ROLE]

[COMPANY TYPE/INDUSTRY]

HOW TO USE

- 1 Set the role and company type you're actually preparing for
- 2 Answer for real, out loud if possible — don't just think the answer
- 3 Let it push back with follow-ups instead of skipping ahead
- 4 Actually apply the feedback before your real interview

EXAMPLE

Practicing for a product management interview, a vague answer about "improving user experience" gets a direct follow-up: "What specifically did you change, and how did you know it worked?"

EXPECTED RESULT

A realistic back-and-forth with follow-up pressure — not a one-shot Q&A you can prepare a script for.

PRO TIP Do this once without notes in front of you — the follow-up questions are much more revealing of genuine gaps when you can't glance at a prepared answer.

PROMPT #30

Intermediate

Estimated time saved: 15–25 min

Salary Negotiation Script Builder

BEST FOR

Preparing what to actually say when negotiating an offer, instead of freezing in the moment.

USE THIS WHEN

You have an offer (or are close to one) and want to negotiate without sounding aggressive or apologetic.

COPY-READY PROMPT

Copy

Help me prepare for a salary negotiation conversation.

CURRENT OFFER: [AMOUNT/DETAILS]

MY TARGET: [WHAT YOU'RE HOPING FOR]

MY LEVERAGE: [RELEVANT EXPERIENCE, COMPETING OFFERS, MARKET DATA
– WHATEVER YOU ACTUALLY HAVE]

Give me:

1. A short opening line to raise the topic professionally
2. 2–3 ways to justify my ask, based on my actual leverage – not generic confidence lines
3. A response if they say the offer is final
4. A response if they counter with something in between

Keep the tone collaborative, not confrontational – I want to negotiate well, not damage the relationship before I've even started.

How to customise and run this prompt, plus an example, the expected result and one pro tip, continue on the next page.

[CONTINUES → 64](#)

PROMPT #30 — CONTINUED

Generate

from page 63

Salary Negotiation Script Builder

CUSTOMIZE

[AMOUNT/DETAILS]

[WHAT YOU'RE HOPING FOR]

[RELEVANT EXPERIENCE, COMPETING...]

HOW TO USE

- 1 Be honest about your actual leverage — the script only works if the justification is real
- 2 Run it
- 3 Practice the opening line out loud until it doesn't feel awkward
- 4 Prepare for the "offer is final" response even if you don't expect to need it

EXAMPLE

A candidate with one competing offer and 2 years of relevant experience gets a script that references the competing offer diplomatically, without being used as a threat.

EXPECTED RESULT

A realistic, usable script grounded in your actual situation — not generic "know your worth" advice with nothing to back it up.

PRO TIP If your "leverage" section is genuinely thin, ask it directly: "given this, is now actually a good time to negotiate, or should I accept and revisit this at review time?" — sometimes the honest answer is to wait.

PROMPT #31

Beginner

Generate

Estimated time saved: 15–20 min

LinkedIn "About" Section Writer

BEST FOR

Writing a LinkedIn About section that sounds like an actual person, not a resume pasted into paragraph form.

USE THIS WHEN

Your LinkedIn About section is either empty, outdated, or just a copy of your resume summary.

COPY-READY PROMPT

Copy

Write a LinkedIn About section for me.

BACKGROUND: [YOUR ROLE/FIELD, EXPERIENCE LEVEL, KEY SKILLS]

GOAL: [WHAT YOU WANT THIS SECTION TO ACHIEVE – e.g. attract recruiters, showcase expertise, attract clients]

TONE: [e.g. professional-warm / confident-direct / conversational]

Requirements:

- First-person, natural voice – not third-person resume language
- Open with a strong first line, since that's all that shows before "see more"
- Include what I do, how I do it differently, and what I'm looking for – don't just list skills
- End with a light call-to-action appropriate to my goal

How to customise and run this prompt, plus an example, the expected result and one pro tip, continue on the next page.

[CONTINUES → 66](#)

PROMPT #31 — CONTINUED

Generate from page 65

LinkedIn "About" Section Writer

CUSTOMIZE

[YOUR ROLE/FIELD, EXPERIENCE...

[WHAT YOU WANT THIS SECTION TO...

[e.g. professional-warm /...

HOW TO USE

- 1 Give real detail about your background, not just your title
- 2 Be specific about your actual goal — it changes the whole angle
- 3 Run it
- 4 Read the first line alone and make sure it would make you click "see more"

EXAMPLE

A recent graduate targeting entry-level UX roles gets an About section that leads with genuine curiosity about a specific design problem they solved, rather than "Aspiring UX Designer seeking opportunities."

EXPECTED RESULT

A natural-sounding, first-person section built around a real angle — not a keyword-stuffed paragraph.

PRO TIP Rewrite the opening line 3 different ways and pick the one that sounds most like something you'd actually say out loud — that's usually the strongest one.

PROMPT #32

Beginner

Transform

Estimated time saved: 10 min

LinkedIn Headline Optimizer

BEST FOR

Fixing a LinkedIn headline that's just your job title and nothing else.

USE THIS WHEN

Your headline isn't doing any work to show what you actually do or want.

COPY-READY PROMPT

Copy

Give me 5 LinkedIn headline options based on the details below. Each should take a genuinely different angle (not just reworded versions of the same one).

BACKGROUND: [ROLE/FIELD, KEY SKILLS OR SPECIALTY]

GOAL: [e.g. job searching / building authority / attracting clients]

Keep each under 220 characters (LinkedIn's limit). Avoid generic buzzwords like "passionate" or "results-driven" unless backed by something specific.

CUSTOMIZE

[ROLE/FIELD, KEY SKILLS OR...]

[e.g. job searching / building...]

HOW TO USE

- 1 Fill in real specifics, not just your job title
- 2 Run it
- 3 Pick the option that best matches your actual goal (job search vs. authority-building need different angles)
- 4 Update it every few months as your focus shifts

EXAMPLE

Instead of "Software Engineer," options might include "Backend Engineer building fintech infra | Python, distributed systems" — specific enough to signal exactly what you do.

EXPECTED RESULT

Genuinely different headline options with a clear angle each — not five near-identical sentences.

PRO TIP Whichever headline you choose, make sure it would make sense to someone who's never met you — avoid internal jargon from your current company that outsiders won't recognize.

PROMPT #33

Intermediate

Plan

Estimated time saved: 20–30 min

LinkedIn Visibility Content Planner

BEST FOR

Building visibility on LinkedIn in a way that's actually tied to your career goal, not just posting for the sake of posting.

USE THIS WHEN

You want to build a presence on LinkedIn but don't know what to post that would actually help your specific career goal.

COPY-READY PROMPT

Copy

I want to build visibility on LinkedIn for this specific goal:
[CAREER GOAL – e.g. get noticed by recruiters in X field, build authority as a freelancer, grow a specific network].

My background: [YOUR FIELD/EXPERIENCE]

My target audience: [WHO YOU WANT TO SEE THIS – e.g. hiring managers, potential clients, peers in your field]

Give me 8 post ideas, each one tied explicitly to my goal and audience – for each, note: the core idea, why this specific audience would care, and what response/outcome I should hope it gets (comments, DMs, profile views, etc.).

How to customise and run this prompt, plus an example, the expected result and one pro tip, continue on the next page.

[CONTINUES → 69](#)

PROMPT #33 — CONTINUED

Plan from page 68

LinkedIn Visibility Content Planner

CUSTOMIZE

[CAREER GOAL — e.g. get noticed...

[YOUR FIELD/EXPERIENCE]

[WHO YOU WANT TO SEE THIS — e.g...

HOW TO USE

- 1 Be specific about the actual goal — "get a job" is too vague, "get noticed by hiring managers in fintech" is usable
- 2 Name your real target audience, not "everyone"
- 3 Run it
- 4 Pick 2–3 ideas to actually start with rather than trying all 8 at once

EXAMPLE

Goal="get noticed by hiring managers in data analytics," audience="hiring managers and senior analysts" — produces post ideas built around demonstrating specific analytical thinking, not generic "day in my life" content.

EXPECTED RESULT

Post ideas with a clear reason each one serves your specific goal — not a generic content calendar that could apply to anyone.

PRO TIP Track which post types actually get responses from your target audience specifically (not just likes in general) — that's the signal worth doubling down on.

PROMPT #34

Beginner

Generate

Estimated time saved: 10–15 min

Networking/Cold Outreach Message Writer

BEST FOR

Reaching out to someone you don't know for advice, a referral, or an opportunity — without sounding like a template.

USE THIS WHEN

You want to message someone on LinkedIn or email but keep overthinking how to start.

COPY-READY PROMPT

Copy

Write a short outreach message to [WHO YOU'RE MESSAGING AND WHY
– e.g. "a alumnus working at a company I'm interested in"].

Context: [HOW YOU FOUND THEM/WHY THEM SPECIFICALLY]

What I'm actually asking for: [e.g. 15-min call, advice, referral
– be specific and reasonable]

Keep it under 100 words. Make it clear I've done a little research on them specifically, not a copy-paste message. End with a small, easy ask – not a big open-ended one.

How to customise and run this prompt, plus an example, the expected result and one pro tip, continue on the next page.

[CONTINUES → 71](#)

PROMPT #34 — CONTINUED

Generate

from page 70

Networking/Cold Outreach Message Writer

CUSTOMIZE

[WHO YOU'RE MESSAGING AND WHY —...

[HOW YOU FOUND THEM/WHY THEM...

[e.g. 15-min call, advice...

HOW TO USE

- 1 Include a genuine, specific reason you're reaching out to this person
- 2 Ask for something small and concrete, not "pick your brain"
- 3 Run it
- 4 Personalize the first line even further if you know something recent about them

EXAMPLE

Reaching out to a senior designer at a target company because they posted about a project you found genuinely interesting — the message references that specific post, then asks for a brief 15-minute call.

EXPECTED RESULT

A short, specific message that doesn't read as mass-sent — not a generic "I'd love to connect" template.

PRO TIP Messages asking for one small, specific thing get far more replies than open-ended "can I pick your brain sometime" messages — always narrow the ask.

PROMPT #35

Intermediate

Analyze

Estimated time saved: 30–45 min

Career Path Explorer

BEST FOR

Figuring out realistic career directions based on your actual skills and interests, not a generic "top 10 careers" list.

USE THIS WHEN

You're unsure what direction to move in and want a genuinely tailored starting point, not a quiz-result-style article.

COPY-READY PROMPT

Copy

Help me explore realistic career directions based on my actual situation.

MY BACKGROUND: [EDUCATION, EXPERIENCE, SKILLS]

WHAT I ENJOY: [TASKS/SUBJECTS YOU GENUINELY LIKE, NOT WHAT SOUNDS IMPRESSIVE]

CONSTRAINTS: [e.g. location, need for stability, specific interests to avoid]

Suggest 4–5 realistic paths, not a huge generic list. For each:

- Why it fits my actual background and interests
- What skill gap I'd need to close to move toward it
- A realistic first step, not just "get more experience"

Be honest if my stated interests and my background are pulling in different directions – don't paper over that.

How to customise and run this prompt, plus an example, the expected result and one pro tip, continue on the next page.

[CONTINUES → 73](#)

PROMPT #35 — CONTINUED

Analyze from page 72

Career Path Explorer

CUSTOMIZE

[EDUCATION, EXPERIENCE, SKILLS]

[TASKS/SUBJECTS YOU GENUINELY...]

[e.g. location, need for...]

HOW TO USE

- 1 Be honest in "what I enjoy" — don't write what you think sounds good
- 2 Include real constraints, not just aspirations
- 3 Run it
- 4 Pick one path and use the Skill Gap Analyzer (#36) to go deeper on it

EXAMPLE

A commerce graduate who enjoys writing and dislikes pure numbers work gets paths like financial content/communications roles suggested alongside traditional finance roles — with the tension between their degree and interest named directly, not ignored.

EXPECTED RESULT

A short, genuinely tailored set of directions — not a copy-paste "50 careers for your major" listicle.

PRO TIP Pay attention if the same skill gap shows up across multiple suggested paths — that's usually the single most valuable thing to start working on regardless of which direction you pick.

PROMPT #36

Intermediate

Analyze

Estimated time saved: 20–30 min

Skill Gap Analyzer (Role–Level)

BEST FOR

Understanding what's missing between where you are now and a target role in general — broader than one specific job posting.

USE THIS WHEN

You have a target role or career direction in mind and want a realistic gap analysis, not just a list of "skills to learn."

COPY-READY PROMPT

Copy

Compare my current skill set to what's typically expected for [TARGET ROLE], based on common requirements across this type of role (not one specific job posting).

MY CURRENT SKILLS: [LIST WHAT YOU HAVE]

MY EXPERIENCE LEVEL: [e.g. student, 1 year experience, career switcher]

Give me:

1. Skills I already have that transfer well
2. Skills that are commonly required but I'm missing
3. For each missing skill, roughly how critical it is (must-have vs. nice-to-have) and a realistic way to start building it
4. One skill that would give me the most leverage if I focused on it first

How to customise and run this prompt, plus an example, the expected result and one pro tip, continue on the next page.

[CONTINUES → 75](#)

PROMPT #36 — CONTINUED

Analyze from page 74

Skill Gap Analyzer (Role–Level)

CUSTOMIZE

[TARGET ROLE]

[LIST WHAT YOU HAVE]

[e.g. student, 1 year experience...]

HOW TO USE

- 1 List your actual current skills honestly, including informal/self-taught ones
- 2 Run it
- 3 Start with the "most leverage" skill, not the full list at once
- 4 Revisit this every few months as you close gaps

EXAMPLE

A student targeting "data analyst" roles has strong Excel and stats coursework but no SQL — SQL gets flagged as the highest-leverage missing skill, with must-have vs. nice-to-have clearly separated from things like Tableau.

EXPECTED RESULT

A prioritized, realistic gap analysis — not an overwhelming list of every possible skill in the field.

PRO TIP Don't try to close every gap before applying — apply once your "must-have" gaps are reasonably covered, and keep building the "nice-to-have" ones while you're already in the process.

PROMPT #37

Intermediate

Compare

Estimated time saved: 20–30 min

Offer Comparison Analyzer

BEST FOR

Comparing two job offers on more than just the salary number.

USE THIS WHEN

You have multiple offers (or an offer vs. staying put) and want a structured way to think it through.

COPY-READY PROMPT

Copy

Help me compare these options clearly:

OPTION A: [ROLE, COMPANY, COMPENSATION, OTHER DETAILS YOU KNOW]

OPTION B: [SAME DETAILS]

What matters most to me right now: [e.g. growth/learning, stability, compensation, work-life balance, location – rank if you can]

Build a comparison across relevant factors (not just salary), and based on what I said matters most, give me a reasoned recommendation – not just a table. Be clear this is a decision-support tool, the actual choice is mine.

How to customise and run this prompt, plus an example, the expected result and one pro tip, continue on the next page.

[CONTINUES → 77](#)

PROMPT #37 — CONTINUED

Compare from page 76

Offer Comparison Analyzer

CUSTOMIZE

[ROLE, COMPANY, COMPENSATION...

[SAME DETAILS]

[e.g. growth/learning, stability...

HOW TO USE

- 1 Include real details for both options, not just the headline salary
- 2 Be honest about your actual current priorities
- 3 Run it
- 4 Use it to structure your own thinking, not as the final word

EXAMPLE

Comparing a higher-paying role at a large company vs. a lower-paying role with more responsibility at a startup, with "learning/growth" ranked as the top priority — the analysis weighs that factor accordingly rather than defaulting to the higher number.

EXPECTED RESULT

A structured, factor-based comparison reflecting your actual stated priorities — not a generic "here are pros and cons of both" list.

PRO TIP Redo this with a different "what matters most" ranking to see how much the recommendation shifts — if it barely changes, that's a genuinely clear-cut decision; if it flips completely, sit with that.

PROMPT #38

Intermediate

Plan

Estimated time saved: 30–45 min

30–60–90 Day Plan Builder

BEST FOR

Walking into a new role with a clear plan — or presenting one in a final-round interview when asked for it.

USE THIS WHEN

You're starting a new job soon, or an interviewer has asked you to outline your first 90 days.

COPY-READY PROMPT

Copy

Build a 30-60-90 day plan for starting as a [ROLE] at [COMPANY/TYPE OF COMPANY].

Context I know so far: [TEAM SIZE, KEY RESPONSIBILITIES, ANYTHING SPECIFIC ABOUT THE COMPANY/ROLE]

Structure it as:

Days 1–30: Focus on learning and understanding (be specific to this role, not generic "get to know the team")

Days 31–60: Focus on early contribution

Days 61–90: Focus on ownership and initial impact

Keep it realistic for someone new — don't have me "leading major initiatives" in week 2.

How to customise and run this prompt, plus an example, the expected result and one pro tip, continue on the next page.

[CONTINUES → 79](#)

PROMPT #38 — CONTINUED

Plan from page 78

30–60–90 Day Plan Builder

CUSTOMIZE

[ROLE]

[COMPANY/TYPE OF COMPANY]

[TEAM SIZE, KEY RESPONSIBILITIES...]

HOW TO USE

- 1 Include whatever real context you have about the role
- 2 Run it
- 3 If using it for an interview, practice presenting it in under 2 minutes
- 4 If using it for a real new job, revisit and adjust it in week 1 based on what you actually learn

EXAMPLE

A 30-60-90 plan for a new marketing coordinator role starts with auditing existing campaigns and understanding tools (days 1-30), moves to owning smaller campaign pieces (31-60), and proposing one improvement based on what was learned (61-90).

EXPECTED RESULT

A realistic, role-specific progression — not a generic "learn, contribute, lead" template with no actual content.

PRO TIP In an interview setting, explicitly say the plan will adjust once you actually understand real priorities — presenting it as fixed and rigid can come across as presumptuous.

PROMPT #39

Beginner

Generate

Estimated time saved: 5–10 min

Application Follow-Up Email Drafter

BEST FOR

Following up after an application or interview without sounding pushy or desperate.

USE THIS WHEN

It's been a reasonable amount of time since you applied or interviewed and you want to check in professionally.

COPY-READY PROMPT

Copy

Write a short follow-up email for this situation: [e.g. "applied 2 weeks ago, no response" / "interviewed 5 days ago, said they'd follow up this week"].

ROLE: [ROLE/COMPANY]

KEY DETAIL TO REMIND THEM OF: [SOMETHING SPECIFIC FROM YOUR APPLICATION OR INTERVIEW, IF RELEVANT]

Keep it under 80 words. Polite, confident, no apologizing for following up. End with a clear, low-pressure question.

How to customise and run this prompt, plus an example, the expected result and one pro tip, continue on the next page.

[CONTINUES → 81](#)

PROMPT #39 — CONTINUED

Generate

from page 80

Application Follow-Up Email Drafter

CUSTOMIZE

[e.g. "applied 2 weeks ago, no...

[ROLE/COMPANY]

[SOMETHING SPECIFIC FROM YOUR...

HOW TO USE

- 1 Describe your actual situation and timeline
- 2 Run it
- 3 Send it on the same thread as your original application/interview email, not a new one
- 4 Follow up again only after another reasonable gap, not repeatedly

EXAMPLE

After a final-round interview with no response after a week, a short email references a specific topic discussed in the interview and asks about timeline — not "just checking in!" with no substance.

EXPECTED RESULT

A short, professional nudge — not an anxious-sounding message that undersells your candidacy.

PRO TIP Referencing one specific detail from the interview does more work than any amount of polite phrasing — it reminds them who you are among many candidates.

PROMPT #40

Beginner

Generate

Estimated time saved: 5–10 min

Reference Request Message Writer

BEST FOR

Asking someone to be a professional reference without an awkward back-and-forth.

USE THIS WHEN

You need to ask a former manager, professor, or colleague if they'll act as a reference.

COPY-READY PROMPT

Copy

Write a message asking [PERSON'S ROLE/RELATIONSHIP TO YOU — e.g. "my former manager"] to be a reference for a job application.

CONTEXT: [WHAT ROLE YOU'RE APPLYING FOR, AND SOMETHING SPECIFIC YOU WORKED ON TOGETHER]

Keep it short, give them an easy way to say no without it being awkward, and include exactly what they'd need to know if they say yes (what role, what might be asked, rough timeline).

CUSTOMIZE

[PERSON'S ROLE/RELATIONSHIP TO...]

[WHAT ROLE YOU'RE APPLYING FOR...]

HOW TO USE

- 1 Reference something concrete you actually worked on together
- 2 Run it
- 3 Send it with enough notice before they'd actually be contacted
- 4 Follow up with the job details once they say yes, don't make them ask

EXAMPLE

Asking a former internship manager for a reference references the specific project they supervised, states the new role clearly, and offers an easy out ("totally understand if now isn't a good time").

EXPECTED RESULT

A short, low-pressure request that makes it easy to say yes — or to decline gracefully.

PRO TIP Always ask before listing someone as a reference, never after — being caught off guard by a reference call is the fastest way to get a lukewarm reference.

Tone & Clarity Editor — Any Message

BEST FOR

Fixing the tone or clarity of any message — email, Slack, chat — before you send it.

USE THIS WHEN

You've written something but aren't sure if it sounds too blunt, too soft, unclear, or just off.

COPY-READY PROMPT

Copy

Review this message and improve it:

MESSAGE: [PASTE MESSAGE]

CONTEXT: [WHO IT'S TO, AND WHAT YOU WANT THE TONE TO BE — e.g.

"my manager, needs to sound confident not apologetic" or "a client, needs to stay warm but firm on the deadline"]

Give me:

1. The revised message
2. A one-line note on what was off in the original (too blunt, unclear ask, buried the main point, etc.)

Keep my actual meaning and key points intact — don't soften the actual message, just the delivery.

How to customise and run this prompt, plus an example, the expected result and one pro tip, continue on the next page.

[CONTINUES → 86](#)

PROMPT #41 — CONTINUED

Transform

from page 85

Tone & Clarity Editor — Any Message

CUSTOMIZE

[PASTE MESSAGE]

[WHO IT'S TO, AND WHAT YOU WANT...]

HOW TO USE

- 1 Paste your actual draft, not a description of what you want to say
- 2 Specify who it's for and the tone you're aiming for
- 3 Run it
- 4 Read both versions side by side before sending — make sure your actual point wasn't lost

EXAMPLE

A blunt "this needs to be redone" message to a teammate gets revised to stay direct about the issue while sounding collaborative rather than harsh — with a note that the original buried the actual ask in the second sentence.

EXPECTED RESULT

A tonally-adjusted version of your actual message, plus a specific diagnosis of what was off — not a generic "here's a nicer way to say it."

PRO TIP Use this on messages you're about to send when annoyed or rushed — those are exactly the messages most likely to land wrong, and a 30-second check catches it before it's a problem.

PROMPT #42

Beginner

Generate

Estimated time saved: 10–15 min

Difficult Email Composer

BEST FOR

Writing an email you've been avoiding — saying no, pushing back, delivering bad news.

USE THIS WHEN

You know what you need to say but keep putting off writing it because it feels awkward.

COPY-READY PROMPT

Copy

Help me write an email for this difficult situation:

SITUATION: [WHAT YOU NEED TO SAY AND WHY IT'S DIFFICULT]

RECIPIENT: [WHO IT'S TO AND YOUR RELATIONSHIP TO THEM]

WHAT I ACTUALLY NEED TO HAPPEN: [THE OUTCOME YOU WANT]

Write it to be direct but not harsh — clear enough that there's no ambiguity about what I'm saying, without over-apologizing or burying the actual message in softening language.

CUSTOMIZE

[WHAT YOU NEED TO SAY AND WHY...

[WHO IT'S TO AND YOUR...

[THE OUTCOME YOU WANT]

HOW TO USE

- 1 Describe the real situation honestly, including why it's awkward
- 2 Be clear about the actual outcome you need
- 3 Run it
- 4 Read it once as if you were the recipient before sending

EXAMPLE

Needing to tell a vendor a deadline can't be met gets turned into a direct email that states the issue, the new timeline, and what's needed from them — without three paragraphs of apology before getting to the point.

EXPECTED RESULT

A clear, respectful message that actually says the difficult thing — not one so softened the recipient misses the point.

PRO TIP If the draft still feels too harsh or too soft to you, say exactly that and ask for it adjusted one notch in that direction — it's much faster than trying to describe the perfect tone upfront.

PROMPT #43

Beginner

Generate

Estimated time saved: 10–15 min

Cross-Team Update Drafter

BEST FOR

Writing a status update for people outside your immediate team who don't have your full context.

USE THIS WHEN

You need to update stakeholders who aren't in the daily details and don't need (or want) them.

COPY-READY PROMPT

Copy

Write a cross-team status update based on the details below.

WHAT'S HAPPENED: [PASTE ROUGH NOTES/PROGRESS DETAILS]

AUDIENCE: [WHO'S READING THIS – THEIR ROLE/HOW MUCH CONTEXT THEY HAVE]

Structure it as:

- Headline: one-line current status
- What's done, in plain terms (skip internal jargon this audience won't know)
- What's next
- Anything I need from them, clearly flagged, or "nothing needed right now"

Keep it skimmable – assume they have 30 seconds, not 5 minutes.

How to customise and run this prompt, plus an example, the expected result and one pro tip, continue on the next page.

[CONTINUES → 89](#)

PROMPT #43 — CONTINUED

Generate

from page 88

Cross-Team Update Drafter

CUSTOMIZE

[PASTE ROUGH NOTES/PROGRESS...

[WHO'S READING THIS — THEIR...

HOW TO USE

- 1 Dump your actual rough progress notes, don't pre-write it yourself
- 2 Specify how much context the audience actually has
- 3 Run it
- 4 Cut any line that still assumes insider knowledge

EXAMPLE

Engineering progress notes full of technical detail get translated into a plain-language update for a non-technical stakeholder group, with a clear headline and one flagged action item.

EXPECTED RESULT

A skimmable update genuinely written for an outside audience — not your internal notes with the jargon left in.

PRO TIP If there's truly nothing needed from the reader, say so explicitly ("no action needed") — it's more respectful of their time than leaving it ambiguous.

PROMPT #44

Intermediate

Plan

Estimated time saved: 15–20 min

Decision-Focused Meeting Agenda Builder

BEST FOR

Running a meeting that actually produces decisions, instead of a list of topics that turns into an open-ended discussion.

USE THIS WHEN

You're organizing a meeting and want it to end with clear outcomes, not just "good discussion."

COPY-READY PROMPT

Copy

Build a meeting agenda for a [LENGTH]-minute meeting about: [TOPICS/GOALS].

For each agenda item:

- State the specific decision or outcome it needs to produce (not just the topic name)
- Assign a time box based on the total meeting length – the time boxes must add up to the total, with 5 minutes buffer at the end
- Flag which items are actually decisions vs. which are just updates that could've been an email instead

If the topic list is too much for the time available, tell me directly what to cut or move to a separate meeting.

How to customise and run this prompt, plus an example, the expected result and one pro tip, continue on the next page.

[CONTINUES → 91](#)

PROMPT #44 — CONTINUED

Plan from page 90

Decision-Focused Meeting Agenda Builder

CUSTOMIZE

[LENGTH]

[TOPICS/GOALS]

HOW TO USE

- 1 List your real topics and the actual meeting length
- 2 Run it
- 3 If it flags "could've been an email," seriously consider cutting it
- 4 Share the agenda in advance so people arrive ready to decide, not just discuss

EXAMPLE

A 30-minute meeting with 6 topics gets restructured to 4 actual decision items with time boxes, and 2 items flagged as better suited to an async update instead of meeting time.

EXPECTED RESULT

A time-boxed agenda built around decisions, with honest flags on what shouldn't be a meeting at all — not just a list of topic headers.

PRO TIP End every meeting by reading the decisions made out loud against this agenda — it's the fastest way to catch when a "decision" item quietly became "we'll discuss more later."

PROMPT #45

Beginner

Transform

Estimated time saved: 15–20 min

Meeting Notes → Action Items Converter

BEST FOR

Turning messy meeting notes into a clear list of who's doing what by when.

USE THIS WHEN

You (or someone) took rough notes during a meeting and need to extract the actual action items before people forget what they agreed to.

COPY-READY PROMPT

Copy

Extract clear action items from these meeting notes:

NOTES: [PASTE ROUGH NOTES]

For each action item, identify:

- What needs to be done
- Who owns it (if mentioned – if unclear, mark [OWNER UNCLEAR])
- Any deadline mentioned (if none, mark [NO DEADLINE SET])

Separate genuine action items from things that were just discussed without a clear next step. Don't invent owners or deadlines that weren't actually mentioned.

How to customise and run this prompt, plus an example, the expected result and one pro tip, continue on the next page.

[CONTINUES → 93](#)

PROMPT #45 — CONTINUED

Transform from page 92

Meeting Notes → Action Items Converter

CUSTOMIZE

[PASTE ROUGH NOTES]

[OWNER UNCLEAR]

[NO DEADLINE SET]

HOW TO USE

- 1 Paste your actual raw notes, messy is fine
- 2 Run it
- 3 Fill in anything marked [OWNER UNCLEAR] or [NO DEADLINE SET] by checking with the team
- 4 Send the clean list to everyone within the same day, while it's still fresh

EXAMPLE

Scattered notes from a planning meeting get sorted into 5 clear action items with owners, 2 items missing a deadline flagged for follow-up, and one "discussed but no decision made" item separated out.

EXPECTED RESULT

A clean, accurate action item list — not a list padded with invented owners or deadlines that were never actually agreed on.

PRO TIP Any item that consistently comes back as [OWNER UNCLEAR] across multiple meetings is usually a sign the team needs to explicitly assign ownership, not just note it down again.

PROMPT #46

Beginner

Generate

Estimated time saved: 5–10 min

Post-Meeting Follow-Up Email

BEST FOR

Sending a clean recap right after a meeting so nothing gets lost or misremembered.

USE THIS WHEN

A meeting just ended and you want to confirm what was decided before people's memories drift.

COPY-READY PROMPT

Copy

Write a short follow-up email recapping this meeting:

KEY POINTS DISCUSSED: [PASTE NOTES OR ROUGH SUMMARY]

DECISIONS MADE: [LIST THEM]

ACTION ITEMS: [WHO'S DOING WHAT, IF KNOWN]

Keep it brief and scannable – bullet points, not paragraphs.
End by asking if anyone read it differently than what actually happened, so misunderstandings surface now rather than later.

CUSTOMIZE

[PASTE NOTES OR ROUGH SUMMARY]

[LIST THEM]

[WHO'S DOING WHAT, IF KNOWN]

HOW TO USE

- 1 Fill in what actually happened, not what you wish had been decided
- 2 Run it
- 3 Send it within an hour or two of the meeting while it's still fresh
- 4 Actually read replies if someone flags a different understanding — that's valuable, not annoying

EXAMPLE

A recap email after a client call lists 3 decisions and 2 action items in bullet form, ending with "let me know if I've captured this differently than you understood it."

EXPECTED RESULT

A short, accurate recap that surfaces misunderstandings early — not a long-winded summary nobody reads.

PRO TIP Sending this consistently after every meeting, even small ones, builds a habit that saves you from "I thought we agreed on X" disputes weeks later.

PROMPT #47

Intermediate

Plan

Estimated time saved: 20–30 min

Report Structuring Assistant

BEST FOR

Planning the structure of a report before you start writing, so you're not reorganizing halfway through.

USE THIS WHEN

You have the content/findings for a report but aren't sure how to organize it for your specific audience.

COPY-READY PROMPT

Copy

Help me structure a report on: [TOPIC/PURPOSE]

Key content I have: [ROUGH LIST OF FINDINGS/POINTS TO INCLUDE]

Audience: [WHO'S READING IT AND WHAT THEY CARE ABOUT MOST]

Give me a section-by-section structure (not the full written report) – what each section should cover and in what order, based on what this specific audience needs to see first. Flag if any of my content doesn't clearly fit anywhere, rather than forcing it in.

CUSTOMIZE

[TOPIC/PURPOSE]

[ROUGH LIST OF FINDINGS/POINTS TO...]

[WHO'S READING IT AND WHAT THEY...]

HOW TO USE

- 1 List your actual findings, even roughly
- 2 Be specific about the audience's real priorities
- 3 Run it
- 4 Write into the structure section by section rather than trying to write the whole thing linearly

EXAMPLE

A quarterly performance report for senior leadership gets structured to lead with headline outcomes and recommendations first, with supporting data moved later — instead of a chronological "here's everything we did" structure.

EXPECTED RESULT

A structure genuinely built around what this audience needs first — not a generic report template.

PRO TIP If the audience is senior/time-constrained, always ask for "outcomes and recommendations first" ordering — most report structures default to a build-up that buries the actual point.

PROMPT #48

Intermediate

Transform

Estimated time saved: 15–25 min

Executive Summary Writer

BEST FOR

Writing a tight executive summary for something you've already written in full.

USE THIS WHEN

You have a completed report/document and need a summary that stands alone at the top.

COPY-READY PROMPT

Copy

Write an executive summary for the document below.

DOCUMENT: [PASTE FULL DOCUMENT OR DETAILED CONTENT]

Requirements:

- Under 200 words
- Lead with the single most important takeaway, not background context
- Include only what a busy reader needs to know without reading the full document
- If there's a recommendation or decision needed, state it clearly near the top, not buried at the end

How to customise and run this prompt, plus an example, the expected result and one pro tip, continue on the next page.

[CONTINUES → 97](#)

PROMPT #48 — CONTINUED

Transform from page 96

Executive Summary Writer

CUSTOMIZE

[PASTE FULL DOCUMENT OR DETAILED...]

HOW TO USE

- 1 Paste the actual completed document, not a rough outline
- 2 Run it
- 3 Place it at the very top of the document, before the table of contents if there is one
- 4 Read it standalone — it should make sense to someone who reads nothing else

EXAMPLE

A 6-page project retrospective gets condensed into a summary that opens with the project's outcome and one clear recommendation, not a recap of the project's background.

EXPECTED RESULT

A genuinely standalone summary a busy reader could act on without reading further — not a shortened version of the intro paragraph.

PRO TIP Write the executive summary last, after the full document is done — trying to write it first usually just produces a vaguer version of your introduction.

PROMPT #49

Intermediate

Analyze

Estimated time saved: 30–60 min

Multi-Source Research Synthesizer

BEST FOR

Combining information from several sources into one coherent picture instead of reading them one at a time and manually connecting the dots.

USE THIS WHEN

You have multiple articles, reports, or notes on the same topic and need the combined picture, including where they disagree.

COPY-READY PROMPT

Copy

I have multiple sources on the same topic. Synthesize them into one coherent summary.

SOURCE 1: [PASTE OR SUMMARIZE]

SOURCE 2: [PASTE OR SUMMARIZE]

SOURCE 3 (if any): [PASTE OR SUMMARIZE]

Give me:

1. Points where the sources agree
2. Points where they genuinely disagree or emphasize different things – don't smooth over real disagreements
3. Anything only one source mentions that seems important
4. An overall synthesis in plain language

Attribute each point to which source(s) it came from.

How to customise and run this prompt, plus an example, the expected result and one pro tip, continue on the next page.

[CONTINUES → 99](#)

PROMPT #49 — CONTINUED

Analyze from page 98

Multi-Source Research Synthesizer

CUSTOMIZE

[PASTE OR SUMMARIZE]

HOW TO USE

- 1 Paste in real content from each source, not just topic names
- 2 Run it
- 3 Pay particular attention to the disagreement section — that's usually the most useful part
- 4 Go back to original sources for anything you'll directly cite

EXAMPLE

Three articles on remote work productivity get synthesized to show where they agree (flexibility helps focus work) and where they genuinely diverge (mixed evidence on collaboration quality) — rather than blending it into one falsely unified conclusion.

EXPECTED RESULT

A synthesis that preserves real disagreement between sources — not an artificially smoothed-over summary.

PRO TIP If every source conveniently "agrees," double check — that's sometimes a sign the sources are all citing the same original claim rather than independently confirming it.

PROMPT #50

Beginner

Transform

Estimated time saved: 10–20 min

Document Simplifier for Non-Experts

BEST FOR

Making a technical or specialized document understandable to someone outside that field.

USE THIS WHEN

You need to share something technical with people who don't have your background — a client, a non-technical manager, a new team member.

COPY-READY PROMPT

Copy

Rewrite the following so someone with no background in [FIELD/SUBJECT] can understand it, without losing the important substance.

DOCUMENT: [PASTE TEXT]

Replace or briefly explain jargon rather than just removing it if the term is genuinely necessary. Add a one-line "why this matters" note at the end if it isn't already obvious from the content.

How to customise and run this prompt, plus an example, the expected result and one pro tip, continue on the next page.

[CONTINUES → 101](#)

PROMPT #50 — CONTINUED

Transform from page 100

Document Simplifier for Non-Experts

CUSTOMIZE

[FIELD/SUBJECT]

[PASTE TEXT]

HOW TO USE

- 1 Paste the actual technical text
- 2 Specify the field so it knows what counts as jargon here
- 3 Run it
- 4 Have an actual non-expert skim it if possible — that's the real test

EXAMPLE

A technical security audit summary gets rewritten for a non-technical client, keeping necessary terms like "two-factor authentication" but briefly explained, with unnecessary jargon removed entirely.

EXPECTED RESULT

A genuinely accessible version that keeps necessary substance — not an oversimplified version that loses important nuance.

PRO TIP Ask for a second pass specifically checking "did I remove anything that a non-expert actually needed to know, even if it's harder to explain?" — simplification sometimes cuts important caveats along with the jargon.

PROMPT #51

Intermediate

Transform

Estimated time saved: 30–45 min

SOP Writer

BEST FOR

Turning a process that lives in your head (or in messy notes) into a document someone else could actually follow.

USE THIS WHEN

You do something repeatedly and need to document it — for a new team member, for consistency, or so it doesn't depend only on you.

COPY-READY PROMPT

Copy

Turn this into a clear Standard Operating Procedure (SOP):

PROCESS DETAILS (rough/unordered is fine): [DESCRIBE THE PROCESS AS YOU'D EXPLAIN IT TO SOMEONE, INCLUDING ANY EXCEPTIONS OR EDGE CASES YOU KNOW ABOUT]

Structure it as:

- Purpose (why this process exists, one line)
- Prerequisites (what's needed before starting)
- Numbered steps, written so someone unfamiliar could follow without asking questions
- Common mistakes or edge cases, clearly separated at the end

Flag with [NEEDS CLARIFICATION] anywhere my description was ambiguous, rather than guessing what I meant.

How to customise and run this prompt, plus an example, the expected result and one pro tip, continue on the next page.

[CONTINUES → 103](#)

PROMPT #51 — CONTINUED

Transform

from page 102

SOP Writer

CUSTOMIZE

[DESCRIBE THE PROCESS AS YOU'D...

[NEEDS CLARIFICATION]

HOW TO USE

- 1 Explain the process as if talking to a new hire, including the messy exceptions
- 2 Run it
- 3 Resolve anything flagged [NEEDS CLARIFICATION]
- 4 Have someone unfamiliar with the process actually try following it as a test

EXAMPLE

A rough explanation of how customer refunds are processed, including 2 edge cases, becomes a numbered SOP with prerequisites, clear steps, and a separated "common mistakes" section at the end.

EXPECTED RESULT

A document someone unfamiliar could genuinely follow — not a rough description reformatted with numbers.

PRO TIP The edge cases and exceptions are usually the most valuable part of an SOP — don't let them get trimmed for length, that's exactly where new team members get stuck.

PROMPT #52

Beginner

Transform

Estimated time saved: 15–30 min

Long Document Summarizer

BEST FOR

Getting through something long you need to read — a report, a policy doc, a long article — without reading every word.

USE THIS WHEN

You need to understand a long document's content but don't need to memorize every detail.

COPY-READY PROMPT

Copy

Summarize the following document:

DOCUMENT: [PASTE TEXT]

Give me:

1. The core purpose/argument in 2–3 sentences
2. Key points, organized by section if the document has clear sections
3. Anything that seems like it needs a decision or action from me specifically, if applicable
4. What's NOT covered that I might expect this type of document to cover

Don't add outside information — summarize only what's actually in the text.

How to customise and run this prompt, plus an example, the expected result and one pro tip, continue on the next page.

[CONTINUES → 105](#)

PROMPT #52 — CONTINUED

Transform from page 104

Long Document Summarizer

CUSTOMIZE

[PASTE TEXT]

HOW TO USE

- 1 Paste the full document, or as much as fits
- 2 Run it
- 3 Skim the summary first to decide which sections need a full read
- 4 Read the actual source fully for anything you're responsible for acting on

EXAMPLE

A lengthy new company policy document gets summarized into core purpose, section-by-section key points, and a flag on what action (if any) is required from the reader.

EXPECTED RESULT

An accurate summary that helps you decide what to read in full — not a substitute for reading the parts that actually matter to you.

PRO TIP Never treat an AI summary as the final word on something you're legally or contractually bound by — use it to navigate, then read the actual relevant sections yourself.

PROMPT #53

Intermediate

Plan

Estimated time saved: 15–20 min

Energy-Matched Daily Priority Planner

BEST FOR

Building a daily plan that accounts for when you actually have focus, not just a flat to-do list.

USE THIS WHEN

You keep making to-do lists that don't get finished because they ignore when you actually have energy for hard tasks.

COPY-READY PROMPT

Copy

Help me plan today based on my actual energy pattern, not just a task list.

TASKS TODAY: [LIST THEM, WITH ROUGH EFFORT LEVEL IF YOU KNOW IT – high focus / low focus / quick]

MY ENERGY PATTERN: [e.g. "sharp in the morning, foggy after lunch, okay again in the evening"]

FIXED COMMITMENTS: [MEETINGS/CLASSES WITH SET TIMES]

Build a schedule that places high-focus tasks in my actual high-energy windows, and low-focus/admin tasks in my lower-energy windows. If I clearly have more high-focus tasks than high-energy time available, tell me directly instead of cramming it all in.

How to customise and run this prompt, plus an example, the expected result and one pro tip, continue on the next page.

[CONTINUES → 107](#)

PROMPT #53 — CONTINUED

Plan from page 106

Energy-Matched Daily Priority Planner

CUSTOMIZE

[LIST THEM, WITH ROUGH EFFORT...

[e.g. "sharp in the morning...

[MEETINGS/CLASSES WITH SET TIMES]

HOW TO USE

- 1 Be honest about your actual energy pattern, not an idealized one
- 2 List real tasks with a rough sense of how demanding each is
- 3 Run it
- 4 If it flags an unrealistic day, actually cut something rather than overriding it

EXAMPLE

Three high-focus tasks and a 2-hour foggy afternoon get scheduled with the hardest task first thing in the morning, admin work in the afternoon slump, and an honest flag that the third high-focus task likely needs to move to tomorrow.

EXPECTED RESULT

A schedule that respects your actual energy, not just time blocks — and an honest flag when there's genuinely too much for one day.

PRO TIP Track for a week which hours you're actually sharp vs. foggy before trusting your own "energy pattern" description — most people's assumptions about their own peak hours are slightly wrong.

PROMPT #54

Intermediate

Plan

Estimated time saved: 25–35 min

Realistic Weekly Capacity Planner

BEST FOR

Planning a week that's actually achievable, by checking your real available hours before committing to a task list.

USE THIS WHEN

Your weeks keep feeling overloaded and you want to know if it's a planning problem or a genuine overcommitment problem.

COPY-READY PROMPT

Copy

Help me plan this week realistically.

FIXED COMMITMENTS THIS WEEK: [CLASSES/MEETINGS/WORK HOURS, WITH ROUGH TIME TOTAL]

TASKS/GOALS FOR THE WEEK: [LIST THEM WITH ROUGH TIME ESTIMATE EACH]

AVAILABLE HOURS OUTSIDE FIXED COMMITMENTS: [YOUR ESTIMATE]

First, calculate whether my task list actually fits in my available hours. If it doesn't, tell me clearly by how much, and suggest what to cut, delay, or delegate – don't just cram everything into a nicer-looking schedule. If it does fit, build me a day-by-day plan with buffer time included, not back-to-back.

How to customise and run this prompt, plus an example, the expected result and one pro tip, continue on the next page.

[CONTINUES → 109](#)

PROMPT #54 — CONTINUED

Plan from page 108

Realistic Weekly Capacity Planner

CUSTOMIZE

[CLASSES/MEETINGS/WORK HOURS...

[LIST THEM WITH ROUGH TIME...

[YOUR ESTIMATE]

HOW TO USE

- 1 Give real hour estimates, not hopeful ones
- 2 Run it
- 3 If it says you're overcommitted, actually cut something rather than just working longer hours
- 4 Build in the buffer time it suggests — don't remove it to fit more in

EXAMPLE

A week with 35 hours of fixed commitments and a task list estimated at 20 more hours, against only 15 available hours, gets flagged as 5 hours over capacity — with a specific suggestion on which lower-priority task to push to next week.

EXPECTED RESULT

An honest capacity check before a schedule, not just a schedule that assumes everything fits.

PRO TIP If you're consistently over capacity week after week, that's not a planning problem to fix with a better prompt — it's a sign your actual commitments need to change.

PROMPT #55

Beginner

Plan

Big Task → Step Breakdown Generator

BEST FOR

Turning an overwhelming, vague task into a concrete list of steps you can actually start on.

USE THIS WHEN

You have a task that feels too big to start, and "just start" isn't helping.

COPY-READY PROMPT

Copy

Break this task down into concrete, actionable steps:

TASK: [DESCRIBE THE TASK]

DEADLINE (if any): [DATE]

WHAT I'VE ALREADY DONE, IF ANYTHING: [DESCRIBE]

Give me steps small enough that each one is clearly doable in one sitting, in the order I should actually do them. Mark the very first step clearly — the one thing I should do right now to get moving.

CUSTOMIZE

[DESCRIBE THE TASK]

[DATE]

[DESCRIBE]

HOW TO USE

- 1 Describe the task honestly, including how stuck you feel
- 2 Run it
- 3 Do the marked "first step" immediately, even if small
- 4 Cross off steps as you go rather than re-planning the whole thing each day

EXAMPLE

"Write my dissertation literature review" — a genuinely overwhelming task — gets broken into steps starting with "list the 5 papers I already know are relevant," a concrete, low-friction first move.

EXPECTED RESULT

Small, genuinely actionable steps — not a restatement of the big task split into 3 vague chunks.

PRO TIP If a "step" still feels too big to start once you see it broken down, that's a sign it needs to be broken down further — ask it to split just that one step again.

PROMPT #56

Intermediate

Plan

Estimated time saved: 25–35 min

Presentation Outline Builder

BEST FOR

Planning a presentation's structure and flow before building actual slides.

USE THIS WHEN

You know what you need to present but aren't sure how to structure it for the time you have and the audience you're presenting to.

COPY-READY PROMPT

Copy

Help me outline a presentation.

TOPIC/GOAL: [WHAT THE PRESENTATION NEEDS TO ACHIEVE]

AUDIENCE: [WHO'S WATCHING AND WHAT THEY CARE ABOUT]

TIME AVAILABLE: [MINUTES]

KEY CONTENT I HAVE: [ROUGH POINTS/DATA/FINDINGS]

Give me a slide-by-slide outline (not full slide content) – what each slide's core message should be, in a logical flow building toward my goal. Include a suggested time allocation per section so it fits my actual time limit.

How to customise and run this prompt, plus an example, the expected result and one pro tip, continue on the next page.

[CONTINUES → 112](#)

PROMPT #56 — CONTINUED

Plan from page 111

Presentation Outline Builder

CUSTOMIZE

[WHAT THE PRESENTATION NEEDS TO...

[WHO'S WATCHING AND WHAT THEY...

[MINUTES]

[ROUGH POINTS/DATA/FINDINGS]

HOW TO USE

- 1 Be specific about the actual goal — persuade, inform, report — since structure differs
- 2 Include your real time limit
- 3 Run it
- 4 Build actual slides from this outline rather than starting from a blank slide deck

EXAMPLE

A 10-minute pitch to investors gets outlined with the problem and market size up front (not buried after team background), with each section time-boxed to fit the full pitch in 10 minutes including Q&A buffer.

EXPECTED RESULT

A logical, time-aware slide flow — not a content dump organized by whatever order you happened to list things in.

PRO TIP For any persuasive presentation, always ask specifically where the strongest point should go — it's often not where people instinctively put it (usually the middle, when it should be near the start or the close).

PROMPT #57

Intermediate

Analyze

Estimated time saved: 20–30 min

Data-to-Insight Summarizer

BEST FOR

Turning raw numbers or data into a plain-language explanation of what it actually means.

USE THIS WHEN

You have data (metrics, survey results, numbers in a spreadsheet) and need to explain what it shows, not just report the numbers.

COPY-READY PROMPT

Copy

Help me turn this data into clear insights, not just a restatement of the numbers.

DATA: [PASTE DATA OR DESCRIBE IT WITH KEY NUMBERS]

CONTEXT: [WHAT THIS DATA IS ABOUT, AND WHAT DECISION OR QUESTION IT RELATES TO]

Give me:

1. What the data actually shows (patterns, not just totals)
2. Anything surprising or worth flagging
3. What it suggests for the actual decision/question, if relevant
4. Any caveat about the data itself I should be aware of (small sample, missing context, etc.)

Don't state a pattern as definite if the data is genuinely ambiguous – say so.

How to customise and run this prompt, plus an example, the expected result and one pro tip, continue on the next page.

[CONTINUES → 114](#)

PROMPT #57 — CONTINUED

Analyze from page 113

Data-to-Insight Summarizer

CUSTOMIZE

[PASTE DATA OR DESCRIBE IT WITH...

[WHAT THIS DATA IS ABOUT, AND...

HOW TO USE

- 1 Provide real numbers, not a vague description of the data
- 2 Explain what decision or question this connects to
- 3 Run it
- 4 Treat the caveats section seriously before presenting conclusions to others

EXAMPLE

Survey results showing declining satisfaction in one specific age group, but stable overall, get flagged as a pattern worth investigating rather than being averaged away into a flat "satisfaction is stable" summary.

EXPECTED RESULT

Genuine pattern-spotting with honest caveats — not just the same numbers restated in sentence form.

PRO TIP Always ask "what would make this conclusion wrong?" as a follow-up — it's the fastest way to catch a pattern that's actually just noise in a small dataset.

PROMPT #58

Intermediate

Brainstorm

Estimated time saved: 20–30 min

Multi-Angle Problem Solver

BEST FOR

Getting genuinely different approaches to a problem, not just one obvious solution restated.

USE THIS WHEN

You're stuck on a work problem and want real options with actual tradeoffs, not just validation of the first idea you had.

COPY-READY PROMPT

Copy

Help me think through this problem from multiple genuinely different angles:

PROBLEM: [DESCRIBE IT CLEARLY]

CONSTRAINTS: [BUDGET, TIME, TEAM SIZE, ANYTHING FIXED]

Give me exactly 3 distinct approaches – not 3 versions of the same idea. For each:

- The core approach in 1-2 sentences
- The main tradeoff or risk
- What would need to be true for this to be the right choice

Then tell me which approach you'd lean toward given my constraints, and why – but make clear this is a starting point for my decision, not the final answer.

How to customise and run this prompt, plus an example, the expected result and one pro tip, continue on the next page.

[CONTINUES → 116](#)

PROMPT #58 — CONTINUED

Brainstorm

from page 115

Multi-Angle Problem Solver

CUSTOMIZE

[DESCRIBE IT CLEARLY]

[BUDGET, TIME, TEAM SIZE...]

HOW TO USE

- 1 State the real problem and real constraints, not an idealized version
- 2 Run it
- 3 Actually consider all 3, not just the one it recommends
- 4 Use "what would need to be true" to sanity-check your gut instinct

EXAMPLE

A problem of declining team velocity gets 3 distinct angles — process change, workload rebalancing, and a tooling fix — each with a clear tradeoff, instead of three flavors of "have a meeting about it."

EXPECTED RESULT

Three genuinely different strategic options with real tradeoffs — not three restatements of the same underlying idea.

PRO TIP If all 3 approaches it gives you feel similar, that's a sign to push back explicitly: "these feel too similar — give me one that's a completely different category of solution."

Time–Zone–Friendly Scheduling Message

BEST FOR

Proposing meeting times across time zones without the back-and-forth confusion.

USE THIS WHEN

You're coordinating with someone in a different time zone and want to propose times clearly the first time.

COPY-READY PROMPT

Copy

Help me write a scheduling message proposing meeting times across time zones.

MY TIME ZONE: [YOUR ZONE]

THEIR TIME ZONE: [THEIR ZONE]

MY AVAILABILITY: [ROUGH WINDOWS THAT WORK FOR YOU]

MEETING PURPOSE: [BRIEF CONTEXT]

Propose 3 specific time options, clearly labeled in both time zones (not just mine), so there's no room for confusion or mental math on their end.

How to customise and run this prompt, plus an example, the expected result and one pro tip, continue on the next page.

[CONTINUES → 118](#)

PROMPT #59 — CONTINUED

Generate

from page 117

Time-Zone-Friendly Scheduling Message

CUSTOMIZE

[YOUR ZONE]

[THEIR ZONE]

[ROUGH WINDOWS THAT WORK FOR YOU]

[BRIEF CONTEXT]

HOW TO USE

- 1 Give your real availability windows
- 2 Include both time zones accurately
- 3 Run it
- 4 Double-check the converted times yourself before sending — always verify time zone math

EXAMPLE

Proposing a call between someone in IST and someone in EST gets 3 options each clearly labeled "10:00 AM IST / 12:30 AM EST" style, removing any ambiguity about which time belongs to which zone.

EXPECTED RESULT

A clear, zone-labeled proposal that requires no mental math from the recipient — not a message assuming they'll convert it themselves.

PRO TIP Always double check AI-generated time zone conversions against a real converter before sending — get this specific detail wrong and it undermines the whole point of the message.

PROMPT #60

Intermediate

Generate

Estimated time saved: 10–15 min

Delegation Brief Writer

BEST FOR

Handing off a task clearly enough that the person doesn't need to come back with clarifying questions.

USE THIS WHEN

You're delegating something and want to get the brief right the first time, instead of a back-and-forth.

COPY-READY PROMPT

Copy

Help me write a clear delegation brief for this task.

TASK: [WHAT NEEDS TO BE DONE]

WHY IT MATTERS: [CONTEXT ON WHY THIS TASK EXISTS — HELPS THE PERSON MAKE GOOD JUDGMENT CALLS]

WHO IT'S FOR: [THEIR ROLE/EXPERIENCE LEVEL WITH THIS TYPE OF TASK]

DEADLINE: [DATE/TIME]

WHAT "DONE" LOOKS LIKE: [HOW YOU'LL KNOW IT'S COMPLETE/CORRECT]

Structure it as: context, the specific ask, what "done" looks like, deadline, and who to contact with questions. Write it at a level of detail appropriate for their experience — more detail for someone new to this type of task, less for someone experienced.

How to customise and run this prompt, plus an example, the expected result and one pro tip, continue on the next page.

[CONTINUES → 120](#)

PROMPT #60 — CONTINUED

Generate

from page 119

Delegation Brief Writer

CUSTOMIZE

[WHAT NEEDS TO BE DONE]

[CONTEXT ON WHY THIS TASK EXISTS...]

[THEIR ROLE/EXPERIENCE LEVEL WITH...]

[DATE/TIME]

[HOW YOU'LL KNOW IT'S...]

HOW TO USE

- 1 Fill in the real context, not just the task itself — the "why" prevents most clarifying questions
- 2 Be specific about what "done" actually looks like
- 3 Run it
- 4 Send it instead of a quick verbal ask when the task has any real ambiguity

EXAMPLE

Delegating a first-draft blog post to a new team member gets a brief that includes why the topic matters to current goals, a clear definition of what a "good enough first draft" looks like, and the deadline — reducing the usual round of clarifying questions.

EXPECTED RESULT

A brief clear enough to prevent most follow-up questions — not a one-line task assignment that assumes shared context.

PRO TIP The "why it matters" section is the most commonly skipped part of delegation, and it's usually what determines whether the person makes good judgment calls on the parts you didn't explicitly specify.

Audience-Matched Content Idea Generator

BEST FOR

Getting content ideas that map to a real audience need and funnel stage, not a flat list of "topics."

USE THIS WHEN

You need fresh content ideas but a generic "give me 10 ideas about X" keeps producing interchangeable, forgettable suggestions.

COPY-READY PROMPT

Copy

Generate content ideas for [NICHE/TOPIC], for [PLATFORM].

MY AUDIENCE: [WHO THEY ARE, WHAT THEY'RE STRUGGLING WITH OR CURIOUS ABOUT]

GOAL: [e.g. attract new audience, build trust with existing audience, drive a specific action]

Give me 8 ideas. For each one, specify:

- The core idea
- Which funnel stage it serves (cold/awareness, warm/consideration, or existing audience/loyalty) – mix across all three, don't give me 8 cold-audience ideas
- The hook angle it would use (curiosity, contrarian take, relatable problem, etc.)

Avoid generic ideas that could apply to any account in this niche

- they should be specific to my stated audience and goal.

How to customise and run this prompt, plus an example, the expected result and one pro tip, continue on the next page.

[CONTINUES → 124](#)

PROMPT #61 — CONTINUED

Generate

from page 123

Audience-Matched Content Idea Generator

CUSTOMIZE

[NICHE/TOPIC]

[PLATFORM]

[WHO THEY ARE, WHAT THEY'RE...]

[e.g. attract new audience, build...]

HOW TO USE

- 1 Describe your real audience's actual problems, not just demographics
- 2 Run it
- 3 Make sure you're not only picking the "coldest" ideas — mix funnel stages for a balanced content mix
- 4 Save ideas you don't use yet in a running list rather than discarding them

EXAMPLE

A personal finance creator targeting students gets ideas spanning a cold "common money mistake" hook, a consideration-stage comparison post, and a loyalty-stage "here's what I actually do" post — not 8 versions of the same budgeting tip.

EXPECTED RESULT

Ideas that map to a real strategic purpose — not an interchangeable list that could belong to any account in the niche.

PRO TIP If you only ever pick the cold-audience ideas because they "sound more viral," you're likely undernourishing the audience you already have — deliberately rotate through funnel stages over a week.

PROMPT #62

Beginner

Generate

Estimated time saved: 10–15 min

Hook Writer (Multiple Angles)

BEST FOR

Getting several genuinely different hook options for one piece of content, instead of one hook you're not sure about.

USE THIS WHEN

You know what your content is about but the opening line isn't landing.

COPY-READY PROMPT

Copy

Write 6 different hooks for content about: [TOPIC/CONTENT SUMMARY], for [PLATFORM].

Use 6 different hook types (don't repeat a type):

1. A surprising statement or stat
2. A direct question to the viewer/reader
3. A relatable problem/pain point
4. A contrarian or myth-busting angle
5. A "before you do X" warning angle
6. A curiosity gap (withhold the payoff)

Keep each hook under 15 words. Don't explain the hooks – just give me the lines, ready to use.

How to customise and run this prompt, plus an example, the expected result and one pro tip, continue on the next page.

[CONTINUES → 126](#)

PROMPT #62 — CONTINUED

Generate

from page 125

Hook Writer (Multiple Angles)

CUSTOMIZE

[TOPIC/CONTENT SUMMARY]

[PLATFORM]

HOW TO USE

- 1 Describe your actual content, not just a broad topic
- 2 Run it
- 3 Pick 2–3 to actually test rather than always defaulting to the same hook type
- 4 Track which type performs best for your specific audience over time

EXAMPLE

Content about a common resume mistake gets 6 hooks ranging from a stat-based opener ("Recruiters spend 7 seconds on your resume") to a myth-busting angle ("Longer resumes don't get you further") — genuinely different entry points, not variations of one idea.

EXPECTED RESULT

Six meaningfully different hook types — not six similar sentences with swapped words.

PRO TIP Your best-performing hook type will differ by platform and audience — don't assume what works on one platform will work the same way on another.

PROMPT #63

Intermediate

Transform

Estimated time saved: 15–25 min

Trend-to-Content Adapter

BEST FOR

Adapting a trending format, sound, or topic to your specific niche without it feeling forced.

USE THIS WHEN

You've spotted a trend and want to use it, but a direct copy wouldn't make sense for your content.

COPY-READY PROMPT

Copy

Help me adapt this trend to my niche in a way that feels natural, not forced.

TREND: [DESCRIBE THE TREND/FORMAT]

MY NICHE: [YOUR TOPIC/INDUSTRY]

MY AUDIENCE: [WHO THEY ARE]

Give me 3 ways to adapt this trend that genuinely connect to my niche – not just my logo slapped onto the trend format. For each, explain briefly why it would make sense to my specific audience. If the trend genuinely doesn't fit my niche well, tell me that directly instead of forcing a weak connection.

How to customise and run this prompt, plus an example, the expected result and one pro tip, continue on the next page.

[CONTINUES → 128](#)

PROMPT #63 — CONTINUED

Transform from page 127

Trend-to-Content Adapter

CUSTOMIZE

[DESCRIBE THE TREND/FORMAT]

[YOUR TOPIC/INDUSTRY]

[WHO THEY ARE]

HOW TO USE

- 1 Describe the trend specifically, including its format/structure
- 2 Be honest about your niche and audience
- 3 Run it
- 4 Skip it entirely if it says the fit is weak — a forced trend often performs worse than no trend at all

EXAMPLE

A trending "things I wish I knew at 18" format gets adapted for a B2B software account into "things I wish I knew before my first product launch" — same structure, genuinely relevant content, instead of an awkward direct copy.

EXPECTED RESULT

A genuine, niche-relevant adaptation — or an honest "this doesn't fit" if that's actually the case.

PRO TIP Trends move fast — if the adaptation needs significant production time, ask whether the trend will still be relevant by the time you publish, and adjust your timeline expectations accordingly.

PROMPT #64

Intermediate

Generate

Estimated time saved: 20–30 min

Short-Form Video Script Writer

BEST FOR

Writing a tight, structured script for a Reel/Short/TikTok-length video.

USE THIS WHEN

You have a topic and a hook but need the full spoken script, structured for a short attention span.

COPY-READY PROMPT

Copy

Write a short-form video script (under [LENGTH] seconds) on: [TOPIC].

HOOK TO USE: [PASTE HOOK, OR ASK IT TO SUGGEST ONE]

KEY POINT(S) TO COVER: [WHAT MUST BE INCLUDED]

CTA: [WHAT YOU WANT THE VIEWER TO DO AT THE END]

Structure it as: Hook (first 2–3 seconds) → Value (the actual content, in short punchy sentences, not paragraphs) → CTA. Write it exactly as it should be spoken, not as a written article – short sentences, natural spoken rhythm.

How to customise and run this prompt, plus an example, the expected result and one pro tip, continue on the next page.

[CONTINUES → 130](#)

PROMPT #64 — CONTINUED

Generate

from page 129

Short-Form Video Script Writer

CUSTOMIZE

[LENGTH]

[TOPIC]

[PASTE HOOK, OR ASK IT TO SUGGEST...]

[WHAT MUST BE INCLUDED]

[WHAT YOU WANT THE VIEWER TO DO...]

HOW TO USE

- 1 Give a real time limit — scripts run long if you don't
- 2 Include your actual key points, don't leave it to guess what matters
- 3 Run it
- 4 Read it out loud and time yourself — cut anything that runs over

EXAMPLE

A 30-second script on "one common budgeting mistake" opens with a punchy hook, delivers one clear point in short spoken-style sentences, and closes with a specific CTA to save the post — not a generic "follow for more."

EXPECTED RESULT

A script written for speaking, with natural rhythm and a real time limit in mind — not a short article reformatted with line breaks.

PRO TIP If reading it out loud takes noticeably longer than your target length, don't just talk faster — cut a sentence. Rushed delivery hurts watch time more than a slightly shorter script does.

PROMPT #65

Intermediate

Plan

Estimated time saved: 25–35 min

Long-Form Video Outline Builder

BEST FOR

Structuring a longer YouTube-style video so it holds attention across several minutes, not just the first 10 seconds.

USE THIS WHEN

You're planning a video longer than a couple of minutes and need a retention-aware structure, not just a topic list.

COPY-READY PROMPT

Copy

Help me outline a long-form video (roughly [LENGTH]) on: [TOPIC].

KEY POINTS TO COVER: [LIST THEM]

GOAL: [e.g. teach something, tell a story, review/analyze something]

Structure it with:

- A hook (first 15-30 seconds) that earns the rest of the watch
- A clear "here's what this video covers" moment right after the hook
- Main sections in a logical order, each with a note on how it keeps attention (a question, a preview of what's coming, a mini-payoff)
- A strong close, not just "thanks for watching"

Flag any point in the structure where attention is likely to drop, based on common retention patterns.

How to customise and run this prompt, plus an example, the expected result and one pro tip, continue on the next page.

[CONTINUES → 132](#)

PROMPT #65 — CONTINUED

Plan from page 131

Long-Form Video Outline Builder

CUSTOMIZE

[LENGTH]

[TOPIC]

[LIST THEM]

[e.g. teach something, tell a...]

HOW TO USE

- 1 List your real key points and actual video goal
- 2 Run it
- 3 Pay attention to the flagged "attention might drop" points — that's where to add a re-hook or preview
- 4 Use this as your recording outline, not a full script

EXAMPLE

A 12-minute tutorial video gets an outline with a hook, a clear roadmap statement, 4 main sections each with a mini-payoff, and a flag that the transition into section 3 is a common drop-off point — suggesting a quick preview of an upcoming payoff there.

EXPECTED RESULT

A structure built around holding attention throughout, not just at the start — with honest flags on likely weak points.

PRO TIP The "here's what this covers" moment right after the hook is one of the most skipped structural elements in amateur long-form content — it's a small addition that measurably helps retention.

PROMPT #66

Beginner

Generate

Estimated time saved: 15–20 min

Podcast/Interview Question Generator

BEST FOR

Preparing genuinely good interview questions instead of generic ones the guest has answered a hundred times.

USE THIS WHEN

You're interviewing someone and want questions that get a real, specific answer, not a rehearsed one.

COPY-READY PROMPT

Copy

Help me prepare interview questions for a conversation with [GUEST'S ROLE/BACKGROUND] about [TOPIC/FOCUS OF THE CONVERSATION].

What I already know about them: [ANYTHING SPECIFIC – THEIR WORK, A SPECIFIC PROJECT, A STANCE THEY'VE TAKEN]

Give me 8 questions:

- 2 warm-up questions that are still specific to them, not generic "tell us about yourself"
- 4 core questions that go deep on the actual topic, including at least one that pushes back on an assumption or asks them to defend a choice
- 2 closing questions, including one that invites a genuinely memorable or quotable answer

Avoid yes/no questions throughout.

How to customise and run this prompt, plus an example, the expected result and one pro tip, continue on the next page.

[CONTINUES → 134](#)

PROMPT #66 — CONTINUED

Generate

from page 133

Podcast/Interview Question Generator

CUSTOMIZE

[GUEST'S ROLE/BACKGROUND]

[TOPIC/FOCUS OF THE CONVERSATION]

[ANYTHING SPECIFIC — THEIR WORK...]

HOW TO USE

- 1 Include real, specific detail about the guest — generic input produces generic questions
- 2 Run it
- 3 Reorder based on natural conversation flow, don't read them like a rigid checklist
- 4 Be ready to go off-script if their answer opens up something more interesting

EXAMPLE

Interviewing a startup founder who's talked publicly about a failed first product gets a question specifically about what they'd tell someone about to make the same mistake — not a generic "what's your founder journey" opener.

EXPECTED RESULT

Specific, well-researched questions that would get a genuinely different answer than a generic interview — not interchangeable questions that could apply to any guest.

PRO TIP The single best question is usually the pushback one — asking a guest to defend or explain a specific choice almost always produces a more interesting answer than an open-ended question.

PROMPT #67

Intermediate

Generate

Estimated time saved: 15–20 min

Hook + CTA Strategy Pairing

BEST FOR

Making sure your call-to-action actually matches the intent of your hook, instead of a mismatched generic CTA.

USE THIS WHEN

You have a hook or content angle and want a CTA that genuinely fits the viewer's mindset at that point, not a bolted-on "follow for more."

COPY-READY PROMPT

Copy

I have this hook/content angle: [PASTE HOOK OR DESCRIBE THE CONTENT]

My actual goal for this piece: [e.g. grow followers, drive comments/engagement, drive traffic to a link, build trust for a future sale]

Suggest 3 CTA options that genuinely match both the hook's tone and my actual goal – explain briefly why each CTA fits this specific hook, not just my general goal. Flag if my stated goal doesn't naturally fit this hook, rather than forcing a mismatched CTA.

How to customise and run this prompt, plus an example, the expected result and one pro tip, continue on the next page.

[CONTINUES → 136](#)

PROMPT #67 — CONTINUED

Generate

from page 135

Hook + CTA Strategy Pairing

CUSTOMIZE

[PASTE HOOK OR DESCRIBE THE...]

[e.g. grow followers, drive...]

HOW TO USE

- 1 Use your real hook, not a placeholder topic
- 2 Be honest about your actual goal for this specific piece
- 3 Run it
- 4 If it flags a mismatch, consider changing the CTA goal for this piece rather than forcing it

EXAMPLE

A hook built around a controversial opinion (which naturally drives debate) paired with a goal of "drive comments" gets a CTA that explicitly invites disagreement — rather than a mismatched "link in bio" CTA that ignores the hook's natural energy.

EXPECTED RESULT

A CTA that flows naturally from the specific hook's energy — not a generic CTA template applied regardless of content type.

PRO TIP A hook that sparks strong opinions is usually better paired with an engagement CTA than a sales CTA — save the sales-focused CTAs for trust-building or demonstration-style content instead.

PROMPT #68

Intermediate

Transform

Estimated time saved: 20–30 min

One Piece → Many Formats Repurposer

BEST FOR

Getting more mileage out of one piece of content by adapting it properly to different formats, not just copy-pasting it everywhere.

USE THIS WHEN

You've created one solid piece of content (a video, article, or post) and want to repurpose it without it feeling recycled.

COPY-READY PROMPT

Copy

Help me repurpose this content into different formats:

ORIGINAL CONTENT: [PASTE OR SUMMARIZE THE ORIGINAL]

FORMATS NEEDED: [e.g. Twitter/X thread, LinkedIn post, Instagram carousel, email newsletter blurb]

For each format, don't just shorten or copy the original – adapt it to how that platform's audience actually consumes content (structure, tone, length norms). Note what changed and why for each version.

How to customise and run this prompt, plus an example, the expected result and one pro tip, continue on the next page.

[CONTINUES → 138](#)

PROMPT #68 — CONTINUED

Transform from page 137

One Piece → Many Formats Repurposer

CUSTOMIZE

[PASTE OR SUMMARIZE THE ORIGINAL]

[e.g. Twitter/X thread, LinkedIn...]

HOW TO USE

- 1 Provide the actual original content, not just its topic
- 2 List the specific formats you need
- 3 Run it
- 4 Adjust further for your specific account's usual voice on each platform

EXAMPLE

A long-form blog post on productivity gets adapted into a punchy Twitter/X thread with one idea per tweet, a LinkedIn post with more professional framing, and a carousel breaking the same content into visual, swipeable chunks — genuinely different structures, same core insight.

EXPECTED RESULT

Format-appropriate adaptations, each noting what changed — not the same text pasted across platforms with different line breaks.

PRO TIP The platform where you repurpose content usually needs the biggest structural change, not just a length change — a carousel and a thread need fundamentally different internal structure even from the same source material.

PROMPT #69

Intermediate

Plan

Estimated time saved: 25–40 min

Balanced Content Calendar Builder

BEST FOR

Planning a content calendar that's actually balanced across content types and goals, not just a list of dates with topics.

USE THIS WHEN

You need to plan content for an upcoming period and want variety, not the same content type every time.

COPY-READY PROMPT

[Copy](#)

Build a content calendar for [TIME PERIOD], posting [FREQUENCY] on [PLATFORM(S)].

MY CONTENT PILLARS: [YOUR MAIN 3–4 CONTENT THEMES/TOPICS]

ANY KEY DATES TO PLAN AROUND: [LAUNCHES, HOLIDAYS, EVENTS, IF ANY]

Requirements:

- Rotate across all my content pillars — don't over-index on one
- Mix content goals across the period (some engagement-focused, some value-focused, some promotional) rather than repeating the same type
- Flag any key date where I don't yet have a clear content idea, rather than leaving it blank or forcing a weak one
- Note if my posting frequency is unrealistic given the pillar variety I've given you

How to customise and run this prompt, plus an example, the expected result and one pro tip, continue on the next page.

[CONTINUES → 140](#)

PROMPT #69 — CONTINUED

Plan from page 139

Balanced Content Calendar Builder

CUSTOMIZE

[TIME PERIOD]

[FREQUENCY]

[PLATFORM(S)]

[YOUR MAIN 3-4 CONTENT...]

[LAUNCHES, HOLIDAYS, EVENTS, IF...]

HOW TO USE

- 1 Give your real content pillars, not a wishlist of topics you've never actually covered
- 2 Include real key dates you need to plan around
- 3 Run it
- 4 Fill in any flagged gaps before the calendar goes live, not after

EXAMPLE

A one-month calendar posting 4x/week across 3 content pillars gets built with visible rotation (no pillar repeated twice in a row), a mix of goals across the month, and an explicit flag next to a product launch date that still needs a content idea.

EXPECTED RESULT

A genuinely rotated, goal-aware calendar with honest gaps flagged — not a spreadsheet of dates with the same content type repeated.

PRO TIP If one pillar keeps naturally dominating the calendar no matter how you balance it, that's useful signal about where your actual content strength or audience interest lies — don't fight it too hard.

PROMPT #70

Intermediate

Plan

Estimated time saved: 20–30 min

Content Series Planner

BEST FOR

Planning a multi-part content series on one topic that builds across parts, instead of several disconnected posts on the same theme.

USE THIS WHEN

A topic is too big for one piece of content and deserves a proper series.

COPY-READY PROMPT

Copy

Help me plan a [NUMBER]-part content series on: [TOPIC], for [PLATFORM].

Each part should:

- Stand alone well enough that someone who missed part 1 can still get value from part 3
- Build logically toward a fuller picture across the series
- End with a clear reason to want the next part, without being a frustrating cliffhanger

Give me a one-line focus for each part, plus a note on how it connects to the part before and after it.

How to customise and run this prompt, plus an example, the expected result and one pro tip, continue on the next page.

[CONTINUES → 142](#)

PROMPT #70 — CONTINUED

Plan from page 141

Content Series Planner

CUSTOMIZE

[NUMBER]

[TOPIC]

[PLATFORM]

HOW TO USE

- 1 Pick a topic genuinely big enough to deserve multiple parts
- 2 Run it
- 3 Space out publishing rather than dumping the whole series at once, unless your platform favors binge-consumption
- 4 Reference earlier parts briefly in each new one for viewers joining partway through

EXAMPLE

A 4-part series on "starting to invest as a student" gets planned with parts on mindset, the basics, common mistakes, and getting started practically — each standalone but building toward full competence across the series.

EXPECTED RESULT

A genuinely structured series with real connective logic — not 4 posts on the same broad topic with no real relationship between them.

PRO TIP Plan the last part of the series first — knowing where it ends makes the earlier parts naturally build toward something, instead of meandering.

PROMPT #71

Beginner

Plan

Estimated time saved: 15–20 min

Blog Post Outline Generator

BEST FOR

Structuring a blog post before writing, so you're not reorganizing paragraphs halfway through.

USE THIS WHEN

You have a blog topic and know roughly what you want to say but need a clear structure first.

COPY-READY PROMPT

Copy

Help me outline a blog post on: [TOPIC], for [TARGET AUDIENCE].

KEY POINTS I WANT TO MAKE: [LIST THEM]

GOAL: [e.g. educate, persuade, rank for a search term, build authority]

Give me a heading structure (H1, H2s, and brief notes on what each section should cover) that flows logically and serves my stated goal. Suggest where a specific example, story, or data point would strengthen a section, without writing the full content.

How to customise and run this prompt, plus an example, the expected result and one pro tip, continue on the next page.

[CONTINUES → 144](#)

PROMPT #71 — CONTINUED

Plan from page 143

Blog Post Outline Generator

CUSTOMIZE

[TOPIC]

[TARGET AUDIENCE]

[LIST THEM]

[e.g. educate, persuade, rank for...]

HOW TO USE

- 1 List your actual key points, not just the topic
- 2 Be clear about the real goal — it changes the structure
- 3 Run it
- 4 Write into each section using the outline as your guide, not a rigid script

EXAMPLE

A blog post aiming to rank for "how to start freelancing" gets an outline structured around the actual questions someone searching that term would have, with a note suggesting a personal example under the "getting your first client" section.

EXPECTED RESULT

A logical heading structure serving a specific goal — not a generic 5-section template applied to any topic.

PRO TIP If you're writing for search visibility, ask it to phrase your H2s the way someone would actually search, not just as neat topic labels — that alignment matters more than people expect.

PROMPT #72

Beginner

Estimated time saved: 10 min

SEO Title & Meta Description Writer

BEST FOR

Writing a title and meta description that's both search-friendly and actually makes someone want to click.

USE THIS WHEN

You've written content and need the title/meta description that represents it in search results.

COPY-READY PROMPT

Copy

Write an SEO title and meta description for this content:

CONTENT SUMMARY: [WHAT THE CONTENT IS ABOUT]

TARGET KEYWORD/PHRASE: [IF YOU HAVE ONE]

Give me 3 title options (under 60 characters) and 2 meta description options (under 155 characters). Each should include the target keyword naturally, and be written to make someone actually want to click, not just be keyword-stuffed.

CUSTOMIZE

[WHAT THE CONTENT IS ABOUT]

[IF YOU HAVE ONE]

HOW TO USE

- 1 Summarize your actual content accurately
- 2 Include your real target keyword if you have one
- 3 Run it
- 4 Check character counts before publishing — search engines truncate anything longer

EXAMPLE

An article on budgeting for students gets title options like "A Student's Realistic Guide to Budgeting (That Actually Works)" — natural keyword inclusion, genuine click appeal, under the character limit.

EXPECTED RESULT

Search-friendly options that also read naturally to a human — not keyword-stuffed titles that sound robotic.

PRO TIP If two title options feel equally strong, keep both — swap them after a few weeks and see which one search engines and readers respond to better over time.

PROMPT #73

Intermediate

Generate

Estimated time saved: 20–30 min

Story-Based Content Writer

BEST FOR

Turning a real experience or lesson into content that uses story structure instead of a flat list of tips.

USE THIS WHEN

You have a real experience or lesson to share and want it to land as a story, not a listicle.

COPY-READY PROMPT

Copy

Help me turn this into story-based content for [PLATFORM]:

WHAT HAPPENED: [DESCRIBE THE REAL EXPERIENCE/EVENT]

THE LESSON/POINT: [WHAT YOU WANT THE AUDIENCE TO TAKE AWAY]

Structure it with a clear narrative arc: the setup (what was the situation), the tension (what went wrong or was uncertain), and the resolution (what happened and what you learned) – not a flat list of facts. Keep it grounded in what actually happened, don't dramatize beyond the real events.

How to customise and run this prompt, plus an example, the expected result and one pro tip, continue on the next page.

[CONTINUES → 147](#)

PROMPT #73 — CONTINUED

Generate

from page 146

Story-Based Content Writer

CUSTOMIZE

[PLATFORM]

[DESCRIBE THE REAL EXPERIENCE/EVEN...]

[WHAT YOU WANT THE AUDIENCE TO...]

HOW TO USE

- 1 Describe the real experience honestly, including the messy or uncertain parts
- 2 Be clear about the actual lesson, not just "share an experience"
- 3 Run it
- 4 Edit back toward your real voice — this should sound like you telling it, not a template

EXAMPLE

A real story about a failed first client project gets structured with genuine tension (the moment things started going wrong) and a resolution tied clearly to the actual lesson learned, rather than a flat "3 things I learned from this" list.

EXPECTED RESULT

Content with real narrative tension and payoff — not a list of facts wearing a story's clothing.

PRO TIP The "tension" section is what most people skip when turning experiences into content — without a real moment of uncertainty or difficulty, the story has no reason to hold attention.

PROMPT #74

Beginner

Transform

Estimated time saved: 10–15 min

Fluff-Cutter

BEST FOR

Tightening writing that's running long without cutting anything important — or your actual voice.

USE THIS WHEN

Your draft feels padded or repetitive but you're not sure exactly what to cut.

COPY-READY PROMPT

Copy

Tighten this writing without losing my voice or any actual substance:

TEXT: [PASTE TEXT]

Cut filler words, repeated points, and unnecessary qualifiers. Keep my actual sentence style and tone — don't rewrite it into a generic "clean" voice. Tell me the word count before and after.

CUSTOMIZE

[PASTE TEXT]

HOW TO USE

- 1 Paste your actual draft
- 2 Run it
- 3 Compare the before/after word count
- 4 Read the tightened version out loud to confirm it still sounds like you

EXAMPLE

A rambling 400-word draft gets tightened to 260 words by cutting repeated points and filler phrases like "it's worth noting that," while keeping the writer's actual sentence rhythm intact.

EXPECTED RESULT

A genuinely shorter, tighter version in your own voice — not a generic rewrite that happens to be shorter.

PRO TIP If the tightened version stops sounding like you, tell it directly — "this sounds too formal/generic now, tighten it but keep it casual" — and run it again.

PROMPT #75

Intermediate

Review

Estimated time saved: 15–25 min

Brand Voice Consistency Checker

BEST FOR

Checking whether a piece of content actually matches your established brand voice before it goes out.

USE THIS WHEN

You (or someone else) wrote something and want a check that it sounds "on brand" before publishing.

COPY-READY PROMPT

Copy

Check whether this content matches my brand voice.

MY BRAND VOICE (describe it, or paste 2–3 examples of past content that represent it well): [DESCRIPTION OR EXAMPLES]

CONTENT TO CHECK: [PASTE NEW CONTENT]

Tell me:

1. Where it matches the established voice well
2. Any specific lines that feel off-brand, and why (too formal, too casual, wrong tone for this brand, etc.)
3. A suggested fix for anything flagged, keeping the actual content/message the same

How to customise and run this prompt, plus an example, the expected result and one pro tip, continue on the next page.

Brand Voice Consistency Checker

CUSTOMIZE

[DESCRIPTION OR EXAMPLES]

[PASTE NEW CONTENT]

HOW TO USE

- 1 Give real examples of your established voice, not just adjectives describing it
- 2 Paste the actual new content to check
- 3 Run it
- 4 Fix flagged lines rather than rewriting the whole piece

EXAMPLE

A brand known for direct, no-fluff writing gets a new draft flagged for one overly formal paragraph that doesn't match the established tone, with a suggested rewrite in the brand's usual directness.

EXPECTED RESULT

Specific, actionable flags tied to your actual established voice — not generic "this could be more engaging" feedback.

PRO TIP Keep a running file of 3–5 pieces of content that best represent your brand voice and reuse them as the reference every time — consistency compounds when you check against the same examples repeatedly.

PROMPT #76

Beginner

Transform

Estimated time saved: 10–15 min

Platform-Specific Caption Writer

BEST FOR

Writing a caption that fits how a specific platform's audience actually reads captions, not one generic caption reused everywhere.

USE THIS WHEN

You have a post ready and need a caption tailored to where it's actually going.

COPY-READY PROMPT

Copy

Write a caption for this post, specifically for [PLATFORM].

POST CONTENT/CONTEXT: [WHAT THE POST/IMAGE/VIDEO IS ABOUT]

GOAL: [e.g. engagement, clicks, saves, comments]

Match this platform's actual caption norms — length, tone, use of line breaks, hashtag conventions (or lack of them) — rather than a generic caption. Include a clear hook in the first line since that's often all that shows before "more."

CUSTOMIZE

[PLATFORM]

[WHAT THE POST/IMAGE/VIDEO IS...]

[e.g. engagement, clicks, saves...]

HOW TO USE

- 1 Specify the exact platform, not just "social media"
- 2 Be clear on your actual goal for this specific post
- 3 Run it
- 4 Trim further if it's still longer than what performs well on that platform

EXAMPLE

The same post gets a short, punchy caption with minimal hashtags for Instagram versus a longer, more narrative caption style appropriate for LinkedIn — genuinely different structures, not the same text with different hashtag counts.

EXPECTED RESULT

A caption that matches real platform norms — not one caption copy-pasted everywhere with the hashtag count changed.

PRO TIP First-line hooks matter disproportionately on platforms that truncate captions — always ask specifically for a strong opening line, not just "a caption."

PROMPT #77

Intermediate

Generate

Estimated time saved: 20–30 min

Carousel Post Writer (Slide-by-Slide)

BEST FOR

Structuring a carousel post so each slide earns the swipe to the next one.

USE THIS WHEN

You're building a multi-slide carousel and want each slide to actually hold attention, not just dump information across slides.

COPY-READY PROMPT

Copy

Write a slide-by-slide carousel on: [TOPIC], for [PLATFORM].
Target [NUMBER] slides.

Structure:

- Slide 1: Hook only – make someone want to swipe, don't give away the value yet
- Middle slides: One clear idea per slide, short enough to read in a couple of seconds each
- Final slide: A clear takeaway plus a CTA

For each slide, give me just the text that would appear on it – short, punchy, not paragraphs. Note where a visual (chart, example, before/after) would strengthen a slide.

How to customise and run this prompt, plus an example, the expected result and one pro tip, continue on the next page.

[CONTINUES → 153](#)

PROMPT #77 — CONTINUED

Generate from page 152

Carousel Post Writer (Slide-by-Slide)

CUSTOMIZE

[TOPIC]

[PLATFORM]

[NUMBER]

HOW TO USE

- 1 Pick a topic with enough distinct points to fill the slide count without padding
- 2 Run it
- 3 Design each slide around the short text, don't cram more text in visually
- 4 Use the visual suggestions as a starting point for design

EXAMPLE

A 7-slide carousel on "mistakes to avoid in your first job" opens with a hook slide withholding the list, delivers one mistake per slide in short text, and closes with a takeaway and a save-worthy CTA.

EXPECTED RESULT

Slide text short and structured enough to actually work as a carousel — not paragraphs awkwardly split across slides.

PRO TIP If a middle slide needs more than 2–3 short lines to make its point, that's usually a sign it should be split into two slides instead of condensed further.

PROMPT #78

Beginner

Generate

Estimated time saved: 10–15 min

Headline/Thumbnail A/B Option Generator

BEST FOR

Getting genuinely different headline or thumbnail text options to test against each other, not minor variations.

USE THIS WHEN

You want to A/B test a title or thumbnail text but keep generating options that are basically the same idea reworded.

COPY-READY PROMPT

Copy

Give me 5 headline/thumbnail text options for: [CONTENT TOPIC], for [PLATFORM].

Each option must use a genuinely different angle (not just reworded) — for example: curiosity gap, direct benefit statement, number-based, question format, controversial/bold claim. Label which angle each option uses. Keep each under [CHARACTER/WORD LIMIT] if applicable.

CUSTOMIZE

HOW TO USE

- 1 Give the actual content topic, not a vague theme
- 2 Run it
- 3 Actually test at least 2 genuinely different angles, not 2 versions of your first instinct
- 4 Track which angle wins for your specific audience over time

EXAMPLE

A video about saving money gets 5 distinct thumbnail text options — a number-based "3 mistakes," a bold claim "you're doing this wrong," a curiosity gap "the one thing nobody tells you" — each a different angle, not variations of one.

EXPECTED RESULT

Genuinely different angles worth actually testing against each other — not five near-identical headlines.

PRO TIP Don't judge a headline angle from one test — some angles need a few attempts before you can tell if the angle itself works or if that one instance just didn't land.

PROMPT #79

Comment/Community Reply Assistant

BEST FOR

Replying to comments or community messages quickly without sounding copy-pasted.

USE THIS WHEN

You have a batch of comments/messages to reply to and want quick, genuine-sounding responses.

COPY-READY PROMPT

Copy

Help me write replies to these comments/messages, in my usual voice ([DESCRIBE YOUR TONE – e.g. friendly and casual, professional but warm]):

[PASTE COMMENTS/MESSAGES]

For each one, write a short, specific reply that actually responds to what they said – not a generic "thanks so much!" Vary the phrasing across replies so they don't all sound templated, even when responding to similar comments.

CUSTOMIZE

[DESCRIBE YOUR TONE – e.g.,

[PASTE COMMENTS/MESSAGES]

HOW TO USE

- 1 Paste actual real comments, not paraphrased ones
- 2 Describe your genuine tone, not an aspirational one
- 3 Run it
- 4 Personalize further for any comment that deserves a more specific response

EXAMPLE

Five comments asking similar questions about a product get genuinely varied replies rather than the same copy-pasted response five times, while still answering each specific question asked.

EXPECTED RESULT

Specific, varied replies that respond to what was actually said — not generic templated responses.

PRO TIP For any comment showing real frustration or a genuine complaint, don't use a generated reply as-is — read it carefully and add a personal touch, since those responses get noticed more than routine ones.

PROMPT #80

Intermediate

Analyze

Estimated time saved: 20–30 min

Content Performance Pattern Analyzer

BEST FOR

Finding real patterns across your best and worst performing content, instead of guessing what worked.

USE THIS WHEN

You have performance data on several pieces of content and want to understand what's actually driving the difference.

COPY-READY PROMPT

Copy

Help me find patterns in my content performance.

TOP PERFORMERS: [LIST TOPIC/FORMAT/HOOK FOR YOUR BEST-PERFORMING CONTENT, WITH ROUGH METRICS]

UNDERPERFORMERS: [SAME, FOR YOUR WEAKEST CONTENT]

Identify:

1. What the top performers actually have in common (topic, hook style, format, length, posting time – whatever's evident from what I gave you)
2. What the underperformers have in common
3. One specific, testable change to try based on this pattern – not generic advice like "post more consistently"

Be honest if the sample size is too small to draw a confident conclusion, rather than overstating the pattern.

How to customise and run this prompt, plus an example, the expected result and one pro tip, continue on the next page.

[CONTINUES → 157](#)

PROMPT #80 — CONTINUED

Analyze from page 156

Content Performance Pattern Analyzer

CUSTOMIZE

[LIST TOPIC/FORMAT/HOOK FOR YOUR...]

[SAME, FOR YOUR WEAKEST CONTENT]

HOW TO USE

- 1 Give real data on several pieces, not just your 1 best and 1 worst post
- 2 Run it
- 3 Take the "sample too small" caveat seriously if it comes up
- 4 Test the suggested change deliberately, don't just note it and move on

EXAMPLE

Five top posts all use a question-based hook and post in the evening, while underperformers skew toward statement hooks posted midday — surfacing a specific, testable pattern rather than a vague "post better content" takeaway.

EXPECTED RESULT

A genuine, evidence-based pattern with one specific thing to test — not generic content advice repackaged as "analysis."

PRO TIP Re-run this every month or so as you get more data — patterns based on 5 posts are a hypothesis, patterns based on 30 posts are much closer to a real insight.

PROMPT #81

Beginner

Generate

Estimated time saved: 5–10 min

Customer Support Reply Drafter

BEST FOR

Responding to customer queries or complaints quickly, in a tone that stays calm and helpful even if the customer isn't.

USE THIS WHEN

You need to reply to a customer message and want it to sound professional regardless of how the original message was written.

COPY-READY PROMPT

Copy

Help me write a customer support reply.

CUSTOMER MESSAGE: [PASTE THEIR MESSAGE]

SITUATION/POLICY CONTEXT: [WHAT ACTUALLY HAPPENED, WHAT YOU CAN OFFER, ANY RELEVANT POLICY]

Write a reply that acknowledges their specific issue (not a generic "we're sorry for the inconvenience"), explains clearly what will happen next, and stays calm and professional even if their original message was frustrated or upset. Don't promise anything not covered by the context I gave you.

How to customise and run this prompt, plus an example, the expected result and one pro tip, continue on the next page.

[CONTINUES → 161](#)

PROMPT #81 — CONTINUED

Generate

from page 160

Customer Support Reply Drafter

CUSTOMIZE

[PASTE THEIR MESSAGE]

[WHAT ACTUALLY HAPPENED, WHAT YOU...]

HOW TO USE

- 1 Paste their actual message, including the tone they used
- 2 Give real context on what you can actually offer or do
- 3 Run it
- 4 Read it once more before sending if the original complaint was heated — make sure the reply doesn't accidentally sound dismissive

EXAMPLE

A frustrated message about a delayed order gets a reply that specifically acknowledges the delay (not a generic apology), states the new expected date clearly, and offers what's actually within policy — not an improvised discount.

EXPECTED RESULT

A specific, calm reply that addresses their actual issue — not a generic customer-service template.

PRO TIP For genuinely upset customers, always add one sentence acknowledging their frustration specifically before the resolution — jumping straight to "here's what we'll do" without any acknowledgment often reads as dismissive.

PROMPT #82

Beginner

Generate

Estimated time saved: 15–20 min

FAQ Generator from Product Info

BEST FOR

Building a genuinely useful FAQ section based on real questions customers would actually have, not generic filler questions.

USE THIS WHEN

You're launching or updating a product/service page and need an FAQ section.

COPY-READY PROMPT

Copy

Create an FAQ section based on this product/service info:

PRODUCT/SERVICE INFO: [DESCRIBE WHAT IT IS, KEY FEATURES, PRICING, POLICIES]

COMMON CUSTOMER CONCERNS, IF YOU KNOW ANY: [e.g. questions you've actually been asked before]

Generate 8–10 questions a real potential customer would likely have – including at least 2 questions addressing likely hesitations or objections, not just informational questions. Answer each clearly and honestly based only on the info I gave you – don't invent details like guarantees or policies I didn't mention.

How to customise and run this prompt, plus an example, the expected result and one pro tip, continue on the next page.

[CONTINUES → 163](#)

PROMPT #82 — CONTINUED

Generate

from page 162

FAQ Generator from Product Info

CUSTOMIZE

[DESCRIBE WHAT IT IS, KEY...

[e.g. questions you've actually...

HOW TO USE

- 1 Give real, specific product details — vague input produces generic FAQ questions
- 2 Include real objections you've heard if you have them
- 3 Run it
- 4 Verify every answer against your actual policies before publishing

EXAMPLE

A subscription service's FAQ includes not just "what's included" but also a direct answer to "can I cancel anytime" — addressing a real hesitation rather than only covering informational basics.

EXPECTED RESULT

Questions a real customer would actually ask, including hesitation-addressing ones — not generic filler like "what is your return policy" with no real answer behind it.

PRO TIP Actually track the real questions customers ask you over time and feed them back into this prompt periodically — your FAQ should evolve with real customer behavior, not stay static from launch.

PROMPT #83

Intermediate

Generate

Estimated time saved: 15–25 min

Objection-Handling Script Builder

BEST FOR

Preparing responses to the specific objections you actually hear when selling something.

USE THIS WHEN

You keep hearing the same hesitations from potential customers and want a thoughtful response ready, not an improvised one.

COPY-READY PROMPT

Copy

Help me build responses to common objections for [PRODUCT/SERVICE].

OBJECTIONS I ACTUALLY HEAR: [LIST THE REAL OBJECTIONS/HESITATIONS]

KEY FACTS/VALUE POINTS I CAN USE: [WHAT'S ACTUALLY TRUE ABOUT MY OFFERING THAT ADDRESSES THESE]

For each objection, give me a response that acknowledges the concern genuinely (not dismissively), then addresses it with a real fact or reframe – not just "great question, but actually..." Keep responses conversational, like something you'd actually say, not a scripted sales line.

How to customise and run this prompt, plus an example, the expected result and one pro tip, continue on the next page.

[CONTINUES → 165](#)

PROMPT #83 — CONTINUED

Generate

from page 164

Objection-Handling Script Builder

CUSTOMIZE

[PRODUCT/SERVICE]

[LIST THE REAL OBJECTIONS/HESITATI...]

[WHAT'S ACTUALLY TRUE ABOUT MY...]

HOW TO USE

- 1 List real objections you've actually encountered, not hypothetical ones
- 2 Include real facts to back up each response — don't let it invent value points
- 3 Run it
- 4 Practice saying them out loud so they don't sound like a memorized script in conversation

EXAMPLE

The objection "this seems expensive compared to [competitor]" gets a response that acknowledges the price comparison honestly, then reframes around a specific, real differentiator — not a dismissive "you get what you pay for."

EXPECTED RESULT

Genuine, fact-based responses to your real objections — not generic sales-script rebuttals.

PRO TIP If you can't find a genuinely honest response to an objection, that's valuable information too — it might point to something worth actually fixing about the offering, not just better scripting around it.

PROMPT #84

Beginner

Generate

Estimated time saved: 10–15 min

Product Description Writer

BEST FOR

Writing a product description that sells the benefit, not just lists features.

USE THIS WHEN

You have a product's specs/features but the description isn't converting browsers into buyers.

COPY-READY PROMPT

Copy

Write a product description for: [PRODUCT NAME]

FEATURES/SPECS: [LIST THEM]

TARGET CUSTOMER: [WHO'S BUYING THIS AND WHAT THEY ACTUALLY CARE ABOUT]

For each key feature, connect it to the actual benefit for this specific customer – don't just list specs. Keep the tone [TONE: e.g. premium and minimal / friendly and approachable / direct and no-nonsense]. End with one line that addresses a likely hesitation.

How to customise and run this prompt, plus an example, the expected result and one pro tip, continue on the next page.

[CONTINUES → 167](#)

PROMPT #84 — CONTINUED

Generate

from page 166

Product Description Writer

CUSTOMIZE

[PRODUCT NAME]

[LIST THEM]

[WHO'S BUYING THIS AND WHAT THEY...]

[TONE: e.g. premium and minimal /...]

HOW TO USE

- 1 List real specs/features, not vague descriptions
- 2 Be specific about who's actually buying this
- 3 Run it
- 4 Check that every feature-to-benefit connection is honest, not exaggerated

EXAMPLE

A feature like "12-hour battery life" gets connected to the actual customer benefit — "doesn't need charging mid-shift" for a target customer described as on-the-go professionals — rather than listed as a bare spec.

EXPECTED RESULT

A description that sells the actual benefit to this specific customer — not a spec sheet in paragraph form.

PRO TIP If you're not sure what benefit a feature actually provides, that's worth figuring out before writing the description — a feature nobody can explain the value of usually shouldn't be the headline of your copy.

PROMPT #85

Intermediate

Analyze

Estimated time saved: 30–45 min

Competitor Analysis Starter

BEST FOR

Structuring your thinking about a competitor based on what you already know or observe, before deeper research.

USE THIS WHEN

You want a structured starting point for understanding a competitor, not a substitute for actual market research.

COPY-READY PROMPT

[Copy](#)

Help me structure a competitor analysis for [COMPETITOR NAME], compared to my own business: [BRIEF DESCRIPTION OF YOUR BUSINESS].

WHAT I KNOW ABOUT THEM: [PASTE WHAT YOU'VE OBSERVED — THEIR WEBSITE, PRICING, POSITIONING, REVIEWS YOU'VE SEEN, ETC.]

Organize this into: their apparent strengths, their apparent weaknesses, how they seem to be positioning themselves, and 2–3 questions I still need to research to actually understand them properly. Don't fill gaps with assumptions — clearly mark anything you're inferring versus what I directly told you.

How to customise and run this prompt, plus an example, the expected result and one pro tip, continue on the next page.

[CONTINUES → 169](#)

PROMPT #85 — CONTINUED

Analyze from page 168

Competitor Analysis Starter

CUSTOMIZE

[COMPETITOR NAME]

[BRIEF DESCRIPTION OF YOUR...

[PASTE WHAT YOU'VE OBSERVED —...]

HOW TO USE

- 1 Give real, specific observations, not just "they seem successful"
- 2 Run it
- 3 Actually go research the flagged open questions rather than treating the output as complete
- 4 Revisit periodically — competitor positioning shifts over time

EXAMPLE

Observations about a competitor's pricing page and reviews get organized into clear strengths/weaknesses, with the analysis explicitly flagging "unclear from available info: their actual customer retention" as something to research further, not guessed at.

EXPECTED RESULT

A structured starting framework built honestly on what you actually know — not fabricated competitive intelligence.

PRO TIP Treat this as a way to organize your own observations, not a research tool itself — AI doesn't have live access to a competitor's real, current data unless you provide it.

PROMPT #86

Beginner

Generate

Estimated time saved: 15–20 min

Market Research Question Builder

BEST FOR

Writing survey or interview questions that actually get useful answers, instead of leading or vague questions.

USE THIS WHEN

You're planning to survey or interview potential customers and want questions that produce real insight.

COPY-READY PROMPT

Copy

Help me write research questions to understand [WHAT YOU WANT TO LEARN – e.g. whether people would pay for X, what frustrates people about Y].

WHO I'M ASKING: [YOUR TARGET RESEARCH AUDIENCE]

Give me 6–8 questions. Avoid leading questions (ones that hint at the answer you want) and avoid yes/no questions where an open answer would reveal more. Mix question types: some about past behavior (more reliable than hypotheticals), some about specific pain points, and at most 1–2 about hypothetical future behavior.

How to customise and run this prompt, plus an example, the expected result and one pro tip, continue on the next page.

[CONTINUES → 171](#)

PROMPT #86 — CONTINUED

Generate

from page 170

Market Research Question Builder

CUSTOMIZE

[WHAT YOU WANT TO LEARN — e.g.,...]

[YOUR TARGET RESEARCH AUDIENCE]

HOW TO USE

- 1 Be specific about what you actually need to learn
- 2 Run it
- 3 Prioritize the "past behavior" questions in the actual conversation — they're usually more reliable
- 4 Avoid changing your questions mid-research just because one answer surprised you

EXAMPLE

Instead of asking "would you use a budgeting app?" (hypothetical, unreliable), the question set includes "how do you currently track your spending, if at all?" — a past-behavior question that reveals real habits.

EXPECTED RESULT

Genuinely open, non-leading questions weighted toward reliable past-behavior insight — not a list of yes/no questions that confirm what you already believe.

PRO TIP People are generally unreliable at predicting their own future behavior ("I'd definitely pay for that") — always weight what they say about their actual past behavior more heavily than their hypothetical predictions.

PROMPT #87

Intermediate

Review

Estimated time saved: 20–30 min

Business Idea Pressure–Test

BEST FOR

Getting honest scrutiny on a business idea before investing real time or money into it.

USE THIS WHEN

You have a business idea and want genuine pushback, not validation.

COPY-READY PROMPT

Copy

Pressure-test this business idea honestly – I want real scrutiny, not encouragement.

THE IDEA: [DESCRIBE IT CLEARLY]

WHO IT'S FOR: [TARGET CUSTOMER]

HOW IT WOULD MAKE MONEY: [YOUR CURRENT THINKING]

Give me:

1. The strongest argument against this idea working
2. The biggest untested assumption I'm making
3. What would need to be true for this to actually succeed
4. One cheap, fast way I could test the riskiest assumption before investing significant time or money

Don't soften this to be encouraging – I'd rather find problems now than after I've built something.

How to customise and run this prompt, plus an example, the expected result and one pro tip, continue on the next page.

[CONTINUES → 173](#)

PROMPT #87 — CONTINUED

Review from page 172

Business Idea Pressure-Test

CUSTOMIZE

[DESCRIBE IT CLEARLY]

[TARGET CUSTOMER]

[YOUR CURRENT THINKING]

HOW TO USE

- 1 Describe the idea honestly, including parts you're unsure about
- 2 Run it
- 3 Actually sit with the pushback rather than immediately arguing against it
- 4 Run the suggested cheap test before committing further resources

EXAMPLE

An idea for a subscription meal-prep service gets flagged for its untested assumption about customer willingness to commit to a subscription (vs. one-off purchases), with a suggested low-cost way to test that specific assumption first.

EXPECTED RESULT

Genuine scrutiny and a specific untested assumption to address — not generic encouragement or generic "do more research" advice.

PRO TIP If the "strongest argument against this working" doesn't actually bother you at all, that's a good sign. If it makes you defensive, sit with that reaction — it's often pointing at the real risk.

PROMPT #88

Intermediate

Compare

Estimated time saved: 20–30 min

Pricing Model Comparator

BEST FOR

Comparing different pricing structures for your specific business, not just picking numbers.

USE THIS WHEN

You're deciding how to price something and aren't sure which pricing model (not just which number) fits your situation.

COPY-READY PROMPT

[Copy](#)

Help me compare pricing models for [PRODUCT/SERVICE].

MY SITUATION: [e.g. one-time product vs. ongoing service, typical customer relationship length, your cost structure if known]

MODELS I'M CONSIDERING: [e.g. flat one-time fee, subscription, tiered pricing, usage-based]

For each model, explain: how it would likely play out for my specific situation, the main risk or downside of that model for me, and what type of customer it tends to favor. Don't recommend specific numbers – I need the model comparison, not pricing advice requiring real market data you don't have.

How to customise and run this prompt, plus an example, the expected result and one pro tip, continue on the next page.

[CONTINUES → 175](#)

PROMPT #88 — CONTINUED

Compare

from page 174

Pricing Model Comparator

CUSTOMIZE

[PRODUCT/SERVICE]

[e.g. one-time product vs...]

[e.g. flat one-time fee...]

HOW TO USE

- 1 Describe your real business situation honestly
- 2 List the actual models you're weighing
- 3 Run it
- 4 Use this to narrow down the model, then research actual pricing numbers separately

EXAMPLE

Comparing subscription vs. one-time pricing for a digital course reveals that subscription pricing assumes ongoing value delivery the course may not naturally have — a structural mismatch worth catching before committing to that model.

EXPECTED RESULT

A genuine structural comparison of models for your specific situation — not made-up specific price recommendations.

PRO TIP The model that requires the least behavior change from your specific target customer is often the safer starting choice — you can always evolve pricing structure later once you understand real demand.

PROMPT #89

Intermediate

Generate

Estimated time saved: 20–30 min

Customer Persona Builder

BEST FOR

Building a customer persona grounded in real observations, not a generic demographic profile.

USE THIS WHEN

You want a clearer picture of who you're actually building/marketing for, based on what you've actually observed about your customers.

COPY-READY PROMPT

Copy

Help me build a customer persona based on real information, not assumptions.

WHAT I ACTUALLY KNOW ABOUT MY CUSTOMERS: [REAL OBSERVATIONS – common questions they ask, why they've bought or not bought, demographic patterns you've genuinely noticed, feedback you've received]

Build a persona covering: their actual goal/motivation, their main hesitation or barrier, and how they'd likely describe their own problem in their own words. Clearly separate what's based on what I told you versus any reasonable inference you're making – don't present inferences as confirmed facts.

How to customise and run this prompt, plus an example, the expected result and one pro tip, continue on the next page.

[CONTINUES → 177](#)

PROMPT #89 — CONTINUED

Generate

from page 176

Customer Persona Builder

CUSTOMIZE

[REAL OBSERVATIONS — common...

HOW TO USE

- 1 Provide genuine observations, not a guessed-at ideal customer
- 2 Run it
- 3 Pay attention to what's marked as inference vs. fact — validate the inferences with real customers over time
- 4 Update the persona as you learn more, don't treat it as fixed

EXAMPLE

Based on real recurring questions about "how long does setup take," a persona gets built around a customer whose main hesitation is time investment, not price — a genuinely useful, evidence-based insight rather than a demographic guess.

EXPECTED RESULT

A persona grounded in real signals, with inferences clearly separated from facts — not a generic "Sarah, 28, urban professional" template with no real basis.

PRO TIP A persona built entirely from assumptions with no real customer data behind it is often worse than no persona at all — it creates false confidence. Gather at least a little real signal first.

PROMPT #90

Intermediate

Plan

Estimated time saved: 30–45 min

Lean Business Canvas Builder

BEST FOR

Structuring a business idea properly across all the areas that actually matter, not just the product idea itself.

USE THIS WHEN

You have a business idea and want to think through it completely — customers, costs, channels, advantage — not just the product.

COPY-READY PROMPT

Copy

Help me build a Lean Canvas for this business idea: [DESCRIBE THE IDEA]

Structure it across these 9 blocks, asking me for more detail on any block where my idea description doesn't give you enough to work with, rather than guessing:

1. Problem (top 3 problems worth solving)
2. Customer Segments (including early adopters specifically)
3. Unique Value Proposition
4. Solution
5. Channels (how you'll reach customers)
6. Revenue Streams
7. Cost Structure
8. Key Metrics (what would actually indicate success)
9. Unfair Advantage (something hard for others to copy or buy)

Flag any block that seems weak or unclear based on what I've given you.

How to customise and run this prompt, plus an example, the expected result and one pro tip, continue on the next page.

[CONTINUES → 179](#)

PROMPT #90 — CONTINUED

Plan from page 178

Lean Business Canvas Builder

CUSTOMIZE

HOW TO USE

- 1 Describe your idea as fully as you can
- 2 Answer any follow-up questions it asks rather than letting it guess
- 3 Run it
- 4 Focus first on whichever block it flags as weakest — that's usually your riskiest area

EXAMPLE

A tutoring business idea gets mapped across all 9 blocks, with the "Unfair Advantage" block flagged as genuinely weak since the described idea doesn't yet have anything hard for a competitor to replicate — a useful, honest gap to address.

EXPECTED RESULT

A properly structured 9-block canvas with honest weak-point flags — not a vague one-paragraph business plan.

PRO TIP "Unfair Advantage" is the block almost everyone struggles to fill honestly — if yours is genuinely weak, that's important information now, not something to discover after competitors show up.

PROMPT #91

Beginner

Generate

Estimated time saved: 10–15 min

Elevator Pitch Builder

BEST FOR

Explaining what you do or what your business does in under 30 seconds, clearly.

USE THIS WHEN

You're bad at answering "so what do you do?" concisely and want a tight, natural-sounding pitch ready.

COPY-READY PROMPT

Copy

Help me write a 20–30 second elevator pitch.

WHAT I DO/MY BUSINESS: [DESCRIBE IT]

WHO I'M TYPICALLY PITCHING TO: [e.g. potential customers, investors, at a networking event]

Structure it as: what problem you solve, who you solve it for, and what makes your approach different — in that order, in natural spoken language, not written like a tagline. Keep it conversational enough that I could actually say it out loud without sounding rehearsed.

How to customise and run this prompt, plus an example, the expected result and one pro tip, continue on the next page.

[CONTINUES → 181](#)

PROMPT #91 — CONTINUED

Generate

from page 180

Elevator Pitch Builder

CUSTOMIZE

[DESCRIBE IT]

[e.g. potential customers...]

HOW TO USE

- 1 Describe what you do plainly, without jargon
- 2 Specify your real typical audience for this pitch
- 3 Run it
- 4 Say it out loud several times until it feels natural, not memorized

EXAMPLE

A freelance web developer's pitch leads with the problem (small businesses losing customers to bad websites), not their tech stack — making it clear and relevant to a non-technical listener at a networking event.

EXPECTED RESULT

A natural-sounding, conversational pitch — not a tagline or an elevator pitch that only makes sense written down.

PRO TIP Test it on someone outside your industry — if they can repeat back what you do in their own words afterward, the pitch is actually working.

Decision Matrix Builder (Weighted Comparison)

BEST FOR

Making a genuinely hard decision between multiple options with several factors to weigh, more rigorously than a pros/cons list.

USE THIS WHEN

You're choosing between options and a simple pros/cons list isn't capturing that some factors matter more than others.

COPY-READY PROMPT

Copy

Help me build a weighted decision matrix.

OPTIONS: [LIST THE OPTIONS YOU'RE CHOOSING BETWEEN]

FACTORS THAT MATTER: [LIST WHAT MATTERS IN THIS DECISION]

HOW IMPORTANT EACH FACTOR IS TO ME: [RANK OR RATE THEM, EVEN ROUGHLY]

Build a matrix scoring each option against each factor (based on what I tell you about each option), weighted by importance, and show the resulting totals. Then tell me honestly if the "winning" option is a clear lead or a close call – close calls deserve more thought, not blind trust in the higher number.

How to customise and run this prompt, plus an example, the expected result and one pro tip, continue on the next page.

[CONTINUES → 183](#)

PROMPT #92 — CONTINUED

Compare

from page 182

Decision Matrix Builder (Weighted Comparison)

CUSTOMIZE

[LIST THE OPTIONS YOU'RE CHOOSING...]

[LIST WHAT MATTERS IN THIS...]

[RANK OR RATE THEM, EVEN ROUGHLY]

HOW TO USE

- 1 List real options and honest factor weightings, not idealized ones
- 2 Provide real information about each option against each factor
- 3 Run it
- 4 If it's a close call, treat the matrix as one input to your decision, not the final word

EXAMPLE

Choosing between two apartments weighted on commute time, cost, and space produces a matrix showing a narrow win for one option — flagged explicitly as "close enough that your gut preference should probably decide," rather than presented as a definitive answer.

EXPECTED RESULT

A structured, weighted comparison with an honest read on how decisive the result actually is — not a falsely confident single "winner."

PRO TIP If you find yourself arguing with the matrix's result, that's useful information — it may mean an unstated factor matters more to you than you initially weighted it.

PROMPT #93

Plan

Estimated time saved: 20–30 min

Household Budget Planner

BEST FOR

Building a realistic monthly budget with a clear fallback plan if money's tight, not just a spreadsheet of categories.

USE THIS WHEN

You want to plan your monthly spending and have a ready answer for what to cut if something unexpected comes up.

COPY-READY PROMPT

Copy

Help me build a monthly budget.

MONTHLY INCOME: [AMOUNT]

FIXED EXPENSES: [LIST THEM WITH AMOUNTS – rent, bills, etc.]

VARIABLE EXPENSES: [LIST CATEGORIES – food, transport, entertainment, etc., with rough current spending if known]

SAVINGS GOAL, IF ANY: [AMOUNT OR %]

Build a suggested monthly allocation. Then give me a ranked "cut here first if money's tight this month" list across my variable expenses – ranked by what's easiest to cut with the least real impact on my life, not just the biggest numbers.

How to customise and run this prompt, plus an example, the expected result and one pro tip, continue on the next page.

[CONTINUES → 185](#)

PROMPT #93 — CONTINUED

Plan from page 184

Household Budget Planner

CUSTOMIZE

[AMOUNT]

[LIST THEM WITH AMOUNTS — rent...

[LIST CATEGORIES — food...

[AMOUNT OR %]

HOW TO USE

- 1 Use real numbers, even rough ones
- 2 Run it
- 3 Keep the "cut first" ranking somewhere accessible for the actual month it's tight
- 4 Revisit monthly rather than treating one budget as permanent

EXAMPLE

A tight month budget flags entertainment and dining out as the easiest first cuts, while explicitly keeping transport spending intact since it's tied to getting to work — a ranked, practical fallback, not just a list of categories.

EXPECTED RESULT

A realistic allocation plus a genuinely usable fallback plan — not just a static budget with no plan for when things get tight.

PRO TIP Build the "cut first" list when you're not actually stressed about money — decisions made calmly in advance are almost always better than decisions made in the moment of financial pressure.

PROMPT #94

Intermediate

Plan

Estimated time saved: 30–45 min

Realistic Travel Itinerary Planner

BEST FOR

Planning a trip itinerary that accounts for actual travel time between places, not an overpacked list of attractions.

USE THIS WHEN

You're planning a trip and want a schedule that's actually doable, not an ambitious list you'll never finish in the time you have.

COPY-READY PROMPT

Copy

Help me plan a realistic itinerary for [DESTINATION], [NUMBER] days.

MUST-DOS: [PLACES/THINGS YOU DEFINITELY WANT TO DO]

PACE PREFERENCE: [e.g. relaxed, packed, mix of both]

TRAVEL STYLE: [e.g. walking mostly, public transport, car]

Build a day-by-day plan that accounts for realistic travel time between locations (not just listing places back to back), includes buffer time for meals and rest, and flags if my must-do list is genuinely too ambitious for the days/pace I've described – with a suggestion on what to cut rather than cramming everything in.

How to customise and run this prompt, plus an example, the expected result and one pro tip, continue on the next page.

[CONTINUES → 187](#)

PROMPT #94 — CONTINUED

Plan from page 186

Realistic Travel Itinerary Planner

CUSTOMIZE

[DESTINATION]

[NUMBER]

[PLACES/THINGS YOU DEFINITELY...]

[e.g. relaxed, packed, mix of...]

[e.g. walking mostly, public...]

HOW TO USE

- 1 List real must-dos, not an aspirational wishlist
- 2 Be honest about your actual preferred pace
- 3 Run it
- 4 If it flags the list as too ambitious, actually cut something rather than trying to rush through everything

EXAMPLE

A 3-day city trip with 12 must-see attractions and a "relaxed pace" preference gets flagged as unrealistic, with a suggestion to prioritize 7-8 of them and either extend the trip or move the rest to "if time allows."

EXPECTED RESULT

A day-by-day plan grounded in real travel time and honest capacity — not an idealized list with no regard for how long anything actually takes.

PRO TIP Always build in one genuinely unscheduled block per day, even on a packed trip — the best travel moments are often the ones you didn't plan, and having zero buffer means you never get them.

PROMPT #95

Intermediate

Plan

Estimated time saved: 20–30 min

Waste–Minimizing Weekly Meal Planner

BEST FOR

Planning a week of meals that actually reuses ingredients across days, instead of a different recipe (and shopping list) every single day.

USE THIS WHEN

You want to meal plan for the week without buying a huge, wasteful variety of ingredients you'll only use once.

COPY-READY PROMPT

Copy

Help me plan meals for the week that minimize ingredient waste.

INGREDIENTS I HAVE OR WANT TO USE: [LIST THEM]

NUMBER OF MEALS TO PLAN: [e.g. 7 dinners]

DIETARY NOTES: [ANY RESTRICTIONS/PREFERENCES]

Plan meals that deliberately reuse core ingredients across multiple days (e.g. a vegetable or protein bought once, used in 2-3 different meals prepared differently) rather than a completely different ingredient list each day. Give me a consolidated shopping list organized by how many meals each item is used in.

CUSTOMIZE

[LIST THEM]

[e.g. 7 dinners]

[ANY RESTRICTIONS/PREFERENCES]

HOW TO USE

- 1 List real ingredients you have or are willing to buy
- 2 Specify your actual dietary needs
- 3 Run it
- 4 Shop from the consolidated list, not meal-by-meal

EXAMPLE

A week of dinners deliberately reuses one bulk-bought vegetable across 3 different meals prepared differently (roasted, in a stir-fry, in a soup) instead of requiring a different vegetable for each recipe.

EXPECTED RESULT

A genuinely waste-conscious plan with ingredient reuse built in — not 7 unrelated recipes that happen to be listed together.

PRO TIP Plan around 1-2 "flexible" ingredients (things that work in multiple cuisines/styles) as your reuse anchors — that's what makes the reuse actually work without every meal tasting the same.

PROMPT #96 — CONTINUED

Generate

from page 189

Thoughtful Gift Idea Generator

CUSTOMIZE

[THEIR INTERESTS, RECENT LIFE...]

[WHAT IT'S FOR]

[RANGE]

HOW TO USE

- 1 Give real, specific detail about the person, not just their age/relationship to you
- 2 Run it
- 3 If it asks for more detail, provide it rather than accepting generic suggestions
- 4 Pick the idea with the most specific, genuine justification, not the most impressive-sounding one

EXAMPLE

For a friend who recently started learning pottery and mentioned frustration with cheap tools, a specific pottery tool upgrade gets suggested with the exact reasoning tied to that detail — not a generic "gifts for creative people" list.

EXPECTED RESULT

Ideas justified by specific details about the actual person — not a generic occasion-based gift list.

PRO TIP If none of the 5 ideas feel genuinely tied to the person, that usually means the input description was too generic — go back and add one more specific, recent detail about them.

PROMPT #97

Intermediate

Plan

Estimated time saved: 15–25 min

Difficult Personal Conversation Planner

BEST FOR

Thinking through how to approach a hard personal conversation before you have it.

USE THIS WHEN

You need to talk to someone about something sensitive and want to think it through calmly beforehand, not just wing it.

COPY-READY PROMPT

[Copy](#)

Help me think through how to approach a difficult conversation.

SITUATION: [WHAT'S GOING ON AND WHO IT'S WITH]

WHAT I WANT TO SAY OR ASK FOR: [BE HONEST ABOUT YOUR ACTUAL GOAL]

WHAT I'M WORRIED ABOUT: [HOW THEY MIGHT REACT, WHAT YOU'RE NERVOUS ABOUT]

Help me think through: a calm way to open the conversation, how to state what I need clearly without over-explaining or over-apologizing, and how to handle it if they react defensively or emotionally. This is for my own preparation, not a script to read word-for-word.

How to customise and run this prompt, plus an example, the expected result and one pro tip, continue on the next page.

[CONTINUES → 192](#)

PROMPT #97 — CONTINUED

Plan from page 191

Difficult Personal Conversation Planner

CUSTOMIZE

[WHAT'S GOING ON AND WHO IT'S...]

[BE HONEST ABOUT YOUR ACTUAL GOAL]

[HOW THEY MIGHT REACT, WHAT...]

HOW TO USE

- 1 Be honest about the real situation and your actual goal
- 2 Include your genuine worries about how it might go
- 3 Run it
- 4 Use it as mental preparation, not a script — the real conversation should still sound like you

EXAMPLE

Preparing to ask a roommate to change a recurring behavior gets a calm opening approach, a clear way to state the specific ask, and a plan for staying grounded if the roommate becomes defensive — not a rigid script to memorize.

EXPECTED RESULT

Thoughtful preparation and a way to stay grounded in the moment — not a word-for-word script that will sound robotic if things go off-plan.

PRO TIP The "how to handle a defensive reaction" part is usually the most valuable section — most people over-prepare what they'll say and under-prepare for how they'll stay calm if the other person doesn't respond the way they hoped.

PROMPT #98

Beginner

Transform

Estimated time saved: 15–25 min

Plain–Language Contract/Terms Explainer

BEST FOR

Understanding what a contract or terms document actually says, in plain language, before you sign or agree to it.

USE THIS WHEN

You have a contract, lease, or terms-of-service document and want to understand the actual implications before agreeing.

COPY-READY PROMPT

Copy

Explain the following in plain language:

DOCUMENT/CLAUSE: [PASTE TEXT]

For each key section, tell me what it actually means for me in practice, and flag anything that seems like it could meaningfully affect me (unusual restrictions, fees, obligations, cancellation terms) so I notice it, not just what it means literally.

This is for my understanding only – it is not legal advice, and I should consult an actual lawyer for anything with real financial or legal weight before signing.

How to customise and run this prompt, plus an example, the expected result and one pro tip, continue on the next page.

[CONTINUES → 194](#)

PROMPT #98 — CONTINUED

Transform from page 193

Plain-Language Contract/Terms Explainer

CUSTOMIZE

[PASTE TEXT]

HOW TO USE

- 1 Paste the actual contract/terms text
- 2 Run it
- 3 Note anything flagged as significant and look into it further
- 4 For any contract with real financial or legal stakes, get an actual lawyer's review before signing — this is a starting point for understanding, not a substitute

EXAMPLE

A rental agreement's plain-language breakdown flags an early termination clause as significant, explaining in practical terms what it would cost to break the lease early — something easy to miss in the original legal phrasing.

EXPECTED RESULT

A practical, plain-language understanding of what a document means for you — not a legal opinion or guarantee of accuracy.

PRO TIP Use this to understand terminology, identify unclear clauses, and prepare questions for a qualified professional — not to decide whether a contract is legally safe to sign. For anything with real money or legal consequences attached, an actual professional review is worth the cost.

PROMPT #99

Beginner

Generate

Estimated time saved: 5–10 min

Daily Reflection & Journaling Prompt Generator

BEST FOR

Getting a genuinely useful journaling prompt instead of staring at a blank page or reusing "how was your day."

USE THIS WHEN

You want to journal but don't know where to start, or keep writing the same shallow entry.

COPY-READY PROMPT

Copy

Give me a journaling prompt for today based on this context:
[HOW YOU'RE FEELING TODAY, OR WHAT'S ON YOUR MIND, EVEN ROUGHLY –
OR SAY "NOTHING SPECIFIC" IF YOU JUST WANT A GENERAL PROMPT]

Give me one specific, open-ended prompt (not a yes/no question) that would actually be worth spending 5–10 minutes reflecting on today – tailored to what I shared, not a generic "list 3 things you're grateful for" unless that genuinely fits what I said.

How to customise and run this prompt, plus an example, the expected result and one pro tip, continue on the next page.

[CONTINUES → 196](#)

PROMPT #99 — CONTINUED

Generate

from page 195

Daily Reflection & Journaling Prompt Generator

CUSTOMIZE

[HOW YOU'RE FEELING TODAY, OR...]

HOW TO USE

- 1 Share honestly, even briefly, what's actually on your mind
- 2 Run it
- 3 Actually write for the full 5-10 minutes rather than a single sentence
- 4 Don't overthink the prompt itself — the point is the reflection, not a perfect question

EXAMPLE

Sharing "feeling stressed about a decision I need to make" produces a prompt asking what's actually making the decision feel hard — the uncertainty itself, or fear of a specific outcome — rather than a generic gratitude prompt.

EXPECTED RESULT

A prompt genuinely tailored to what's actually going on for you today — not a recycled generic journaling question.

PRO TIP If a prompt doesn't resonate once you start writing, it's fine to abandon it and write about whatever actually comes up instead — the prompt is a starting point, not a requirement.

PROMPT #100

Beginner

Analyze

Estimated time saved: 15–30 min

Life–Admin Task Simplifier

BEST FOR

Understanding what a confusing bureaucratic task (a form, an application, a process) actually requires, before you get stuck halfway through.

USE THIS WHEN

You're facing a confusing form, application, or official process and want to understand what's actually needed before starting.

COPY-READY PROMPT

Copy

Help me understand what's actually required for this task:
[DESCRIBE THE TASK – e.g. a specific form, application, or process you're dealing with, and paste any instructions you have]

Break it down into:

1. What documents/information I need to gather before I even start
2. The actual steps, in order
3. Anything commonly confusing or easy to get wrong about this specific process, if that's evident from the instructions
4. Roughly how long this realistically takes, based on what I've described

If the instructions I gave you are incomplete or unclear about something important, tell me directly rather than guessing.

How to customise and run this prompt, plus an example, the expected result and one pro tip, continue on the next page.

[CONTINUES → 198](#)

PROMPT #100 — CONTINUED

Analyze from page 197

Life–Admin Task Simplifier

CUSTOMIZE

[DESCRIBE THE TASK — e.g. a...]

HOW TO USE

- 1 Paste actual instructions or details if you have them, not just the task name
- 2 Run it
- 3 Gather everything in the "before you start" list first — this is what usually causes the most restarts
- 4 For official/legal processes, verify time-sensitive or fee-related details against the official source

EXAMPLE

A confusing multi-step government form process gets broken into a clear "gather these documents first" list, ordered steps, and a flag on a commonly-missed requirement — turning an intimidating process into something concrete to start on.

EXPECTED RESULT

A clear breakdown of what's needed and in what order — not a restatement of confusing instructions in slightly different words.

PRO TIP Always double-check fees, deadlines, and eligibility requirements against the actual official source before acting — AI can help you understand the process, but official details change and should be verified directly.

Prompt customization cheat sheet

Seven building blocks. Every strong prompt in this book is some combination of them — and so is every strong prompt you will write yourself.

Role

Who should the AI act as?

A tutor who asks questions instead of explaining · a hiring manager reviewing this resume · an interviewer for this role.

Goal

What do you actually want?

Explain · compare · diagnose · plan · rewrite · review · generate options. Name the verb and the answer changes shape.

Context

What background does it need?

Your level, your subject or industry, your audience, your deadline, exactly where you are stuck.

Input

What are you giving it to work on?

Your raw notes, the paragraph, the job description, the message draft, the real numbers. Paste the actual thing, not a summary of it.

Constraints

What should it avoid or respect?

Word limits, tone, no invented numbers, no guessing what you meant, flag gaps instead of filling them.

Output format

How should the answer be shaped?

Table · tiers · numbered steps · Q&A cards · short fragments · a script you could read out loud.

Review

How will you improve the result?

Ask what nuance was dropped · ask for one notch more direct · ask what would make the conclusion wrong.

Build your own prompt

Fill in the six lines below and you have a prompt as structured as any in this book. Keep a copy — it works for tasks this book does not cover.

THE PROMPT FORMULA

Act as [ROLE].

I want to [GOAL].

Here is my context: [CONTEXT].

Here is my input: [INPUT].

Keep in mind: [CONSTRAINTS].

Give the output as [FORMAT].

If anything I have given you is unclear or missing,
tell me instead of guessing.

ROLE

GOAL

CONTEXT & INPUT

CONSTRAINTS & FORMAT

Test it once, then fix the weakest line. A prompt is a draft like anything else.

Now it is yours.

Prompt type guide

Every prompt in this book is labelled with one of these eight types. If you know the type you need, the index pages become a lookup table.

Generate

Make something that does not exist yet — flashcards, a cover letter, hooks, questions, a script.

Analyze

Look at something you already have and tell you what it means — data, a resume gap, performance patterns.

Transform

Take your input and change its form — messy notes into study notes, jargon into plain language, long into short.

Plan

Turn a goal and a constraint into a sequence — study schedules, agendas, itineraries, 30-60-90 plans.

Compare

Put two or more things side by side on criteria that actually matter — offers, pricing models, confusable concepts.

Review

Have your work or your thinking tested — a mock interview, a brand-voice check, a pressure-tested idea.

Diagnose

Find the cause rather than the symptom — the missing prerequisite, the pattern behind repeated mistakes.

Brainstorm

Open up options you had not considered — genuinely different approaches with real tradeoffs.

Levels are simple: **Beginner** prompts work with one or two placeholders. **Intermediate** prompts want real material pasted in — your notes, your data, your draft.

*Small prompt.
Big result.*

Thank you for being here.

You now have 100 practical AI prompts at your fingertips. Use them, adapt them, and make them your own.

We built this book with one goal: to help you use AI more effectively in real life — studying, working, creating, deciding. If a prompt saved you an hour this week, it did its job.

Learn

Start with the quick-start ten.

Build

Keep the prompts that work for you.

Grow

Write your own with the formula on page 200.

A reminder: AI can produce incorrect or incomplete information. Verify important outputs — especially for academic, financial, legal, employment, medical or other high-impact decisions.
